Dated: 29, December 2001

29 December, 2001

Mr. S. S. M. Sadrul Huda Internship Coordinator

Dear Sir.

Enclosed, is the project of the "Competitive analysis of the Pharmaceutical Companies of Bangladesh, involved in export", which was assigned to me by Mr. K M Tarique, Manager Export on 24 September, 2001 as a requirement of my internship program.

I am pleased to have worked in the Export Department and learnt about the real life of Export activities. I am very much grateful to you for all the cooperation for the completion of the project report and the guidance you provide me during my internship program.

The assigned project was very insightful and relevant to my education. I was able to learn a lot during the project research work on the Pharmaceutical Companies and their international business. This will certainly help me in my future service career.

Thank you for your kind consideration and cooperation in all respect.

Sincerely

Abdullah-Al-Masud

#### **BACK GROUND**

#### What AVENTIS Stands For:

The name Aventis will be synonymous with innovation in the life sciences, with advance products for health and nutrition. Aventis evokes the idea of movement, innovation, science, and future and on going progress. It can easily be pronounced around the world, and easy to remember.

The first element represents precision and conveys the technical and disciplined aspects of science. Light blue demonstrates uniqueness and creativity.

The symbol's center element, a line of dots in motion, represents molecular structures and medicines. Blue represents strengths and stability. The third element-a brushstroke- represents human creativity, the origin of scientific discovery. Its form is organic, suggesting growth and dynamism. Green conveys the new growth and vitality that discovery brings.

The ring unifies and completes the symbol. Together, these elements represent the integration of life and science.

#### Company Mission:

Aventis mission is to become the *Best* pharmaceutical company in the world by dedicating their resources, their talents and engineers to help improve human health and quality of life of people throughout the world.

#### Being the best means

- Being the *Best* at satisfying needs of everyone Aventis serves: patients, healthcare professionals, employees, communities, governments and shareholders.
- Being *Better and Faster* then their competitor at discovering and bringing to market important new medicine s in selected therapeutic areas.
- Operating with *Highest* professional and ethical standards in all their activities, building on the Rhone Poulenc Rorer heritage of integrity.
- Being seen as the Best place to work attracting and retaining talented people at all levels by creating an environment that encourage them to develop their potential to the full.

• Generating consistently *Better* result then their competitors, through innovation and a total commitment to quality in everything we do.

#### **Company Principles:**

Satisfying the needs of the customers: Aventis will strive for the highest quality and continuous improvement of their products and services for all their customers, external and internal, maintaining the highest standards of integrity in all their relationship.

Global communication and collaboration: Aventis will be global company, fostering open communication respectively to new ideas, and world wide collaboration on strategies that support the growth and success of the company.

Being entrepreneurial and acting quickly: Aventis will be entrepreneurial, working with a great séance of urgency, encouraging team and quick decision making, rewarding innovation and result at every level of the organization.

Treating each other fairly and valuing diversity: Aventis will treat each other fairly, with trust and respect, valuing culture and individual differences so that our company is strengthened by our diversity.

Caring for our community and the environment: Aventis will be good neighbors, working to improve the safety of the communities and our workplace. When we operate according to these principles, Rhone Poulenc Rorer will grow and prosper as a company and so will we as individuals.

The Heart of the Company: AVENTIS PHARMA stands out among pharmaceutical companies worldwide for the expertise, commitment and diversity of its people. Its strong, multicultural team brings innovative thinking and customeroriented service to AVENTIS PHARMA.

## The Aventis Pharma Values:

- Respect for people
- Integrity
- Sense of urgency
- Networking
- Creativity
- Empowerment
- Courage

#### **Corporate Company Profile:**

Aventis is an international company with a decentralized and market-focused business structure. The corporate headquarters with the Board of Management and about 150 staff – is located in Strasbourg, France.

Aventis is listed under the symbol "AVE" on the stock exchanges in Paris and Frankfurt as well as on the New York Stock Exchange in the form of American Depotsitary Shares. Aventis is also a component of the Euro Stock 50<sup>TM</sup>, the MSC1 Europe index, the FT/S&P Europe and the CAC stock market indices.

Aventis Pharma is the pharmaceutical business Aventis SA, a world leader in the life sciences created through the December 1999 merger of Hoechst and Rhone-Poulenc. Aventis SA also includes the activities of Aventis Agriculture in crop protection and production as well as animal health and nutrition.

Aventis has what it takes to shape the future in life sciences: an industry leader with more then 90,000 employees in more then 120 countries, 2000 Performa annual sales of 16.09 billion Euro and a research and development budget of 2.7 billion Euro. With a potent budget for the discovery and development of innovative products, Aventis has an excellent position for future growth as well as one of only a few companies with a broad technological platform in genetic engineering and biotechnology as well as in chemical research. Our approach enables scientists within Aventis to share tools, facilities and licenses across all of our businesses. Aventis is an international company with a decentralized and market-focused business structure

Aventis Pharma has set a sales growth target in the mid-high single digits for each of the next several years, excluding the impact of generic competition on the anti-hypertension drug Cardizem® that began in mid-1999. Aventis Pharma has set a target of achieving 750 million Euro in merger synergies by the end of 2002, accounting for a significant portion of the overall savings target of 1.2 billion Euro for all of Aventis. We intend to achieve this target by rationalizing activities in manufacturing, administration and Drug innovation & Approval to maximize effectiveness and eliminate unnecessary duplication.

Aventis Pharma reported 11.835 billion Euro in sales for the first nine months of 2000, accounting for approximately 78% of the total life science sales of Aventis that totaled 15.267 billion Euro. Aventis Agriculture accounts for the balance of sales, which were 3.482 billion Euro. The prescription drugs business reported sales of 10.209 billion Euro for the first nine months of the year, accounting for approximately 86% of Aventis Pharma's worldwide sales. Aventis Pharma sales - First nine months 2000 Prescription drugs Aventis Pharma AG10.209 billion Euro Vaccines Aventis Pasteur790 million Euro

Aventis Pharma is comprised of: Aventis Pharma AG – the prescription drugs business created through the combination of the former Hoechst Marion Roussel and Rhone-Poulenc Rorer pharmaceutical groups; Aventis Pasteur the vaccines business formerly known as Pasteur Merieux Connaught; and Aventis Behring – the therapeutic proteins business that was formerly the Centeon joint venture between Hoechst and Rhone-Poulenc. In addition, Aventis Pharma holds a 51.8% stake in the diagnostics company Dade Behring, (Aventis accounts for Dade Behring using the equity method since we do not have management control over this company.)2000 nine-month sales (Euro million)1999 sales (Euro million) Allegra®/Telfast® New generation of non-sedating products for allergy sufferers. Indicated for seasonal allergic rhinitis and chronic idiopathic urticaria (hives).831729 Lovenox®/Clexane® World's leading low-molecular-weight heparin. Indicated for treatment of deep-vein thrombosis, unstable angina and some myocardial infarctions.726782 Taxotere® An important product for treatment of metastatic breast cancer and non-small-cell lung cancer. In development for additional oncology indications.542500 Amaryl® A third-generation oral treatment for type II (noninsulin-dependent) diabetes patients. Once-daily dosing enhances patient compliance and offers improved convenience.268242Arava@First disease-modifying drug for rheumatoid arthritis that is indicated both to treat signs and symptoms and to retard structural damage in the joints.138107 Aventis Pharma focuses on seven therapeutic areas. The focus on diseases emphasizes unmet medical needs. Antinfectives treatment of bacterial and fungal infections Arthritis/Bone arthritis and osteoporosis Cardiology/Thrombosis - infarctions, coronary heart disease and other cardiovascular disorders Central Nervous System - degenerative diseases of the brain and spinal cord Metabolism - diabetes and other metabolic diseases Oncology Respiratory - asthma and allergies Aventis Pharma offers a range of innovative prescription drugs to treat patients with serious diseases. Our emphasis is on novel drugs in therapeutic areas with high medical need and large patient populations. Eleven of our current products are global strategic brands, and an additional five are considered regional strategic brands. Among the global strategic brands, five important products are driving the sales growth of Aventis Pharma. The life Science business of Germany's HOECHST AG and France's RHONE-POULENC was formally merged into a global Life Science giant called "AVENTIS". On December 16, 1999 one of the Europe's biggest industrial mergers was successfully implemented.

The formation of AVENTIS was earlier approved by the shareholders generally assembly of both HOECHST and RHONE-POULENC. After the successful completion of the share exchange offer to the HOECHST shareholders, RHONE-

POULENC has changed its name into AVENTIS SA, which headquarters will be located in Strasbourg, France. The new AVENTIS SA shares will be trading on the Stock Exchange market in Paris, Frankfurt and New York.

Aventis has what it takes to shape the future in life sciences: an industry leader with 95,000 employees in more than 120 countries, 1999 proforma annual sales of 20.5 billion Euro and a research and budget of 3.0 billion Euro. With a potent budget for the discovery and development of innovative products, Aventis has an excellent position for future growth as well as one of only a few companies with a broad technological platform in genetic engineering and biotechnology as well as in chemical research. Our approach enables scientists within Aventis to share tools, facilities and license across all of our businesses.

AVENTIS PHARMA SA headquartered in Frankfurt, Germany will run the combined global pharmaceutical business of HOECHST and RHONE-POULENC. The agricultural activities will be combined into AVENTIS CROP SCIENCE, which will be based in Lyon, France. Together the two companies will have the largest research and development budgets in the Life Science industry.

Growing sales Worldwide: Aventis Pharma reported 11.835 billion Euro in sales for the first nine months of 2000, accounting for approximately 78% of the total life science sales of Aventis that totaled 15.267 billion Euro. Aventis Agriculture accounts for the balance of sales, which were 3.482 billion Euro. The prescription drugs business reported sales of 10.209 billion Euro for the first nine months of the year, accounting for approximately 86% of Aventis Pharma's worldwide sales

**Colleagues Worldwide:** It is approximately 65,000 associates – scientists studying new molecules, sales reps calling on doctors and pharmacy committees, operators making products – are a diverse group, bridging many nationalities and disciplines.

AVENTIS PHARMA, which ranks in the top tier of pharmaceutical companies worldwide with a turnover of EURO 13.1 billion in the EURO 280 billion industry, will be a top competitor in each of its main areas: prescription drugs, vaccines from AVENTIS PASTEUR and therapeutic proteins from Aventis BEHRING. Products, which are strategically important for AVENTIS PHARMA, include, Allegra, Clexane/Lovenox, Taxotere, Amaryl, Arava. These and other strategic products offer innovative treatment to large patient populations. Aventis BEHRING is currently ranked number two in the EURO 5.3 billion blood plasma products industry.

Bangladesh Subsidiary Company Profile:

Aventis Pharma (pharmaceutical company) is one of the industry leaders in Bangladesh pharmaceutical market, which was created through the merger of Hoechst Marion Roussel and Rhône-Poulenc Rorer two of Germany, and France based large Pharmaceuticals Companies. Aventis Pharma is committed to improve human health through developing and marketing innovative products.

At home, the affiliated Joint Venture companies with the Government of Bangladesh, RHONE-POUNENC RORER Bangladesh Ltd. in the ratio of 60% & 40%, Fisons (Bangladesh) Ltd 52% & 48% and HOECHST MARION ROUSSEL Limited in the ratio of 60% & 40%.

Aventis considers information technology an important corporate asset that enhances its productive and contributes measurably to its overall performance. Confidentiality, integrity and availability of this information asset are critical to continuing success. IS will strategically enable and drive the change process will raise Aventis to the position as the world's leading life science company.

May & Baker: In the early nineteenth century London, as ever, attracting young men to seek employment opportunities in the capital, also gave the same opportunity to join May, a young talented opportunist. He got employed in Batter Sea with Charles John Price-a manufacturing chemist. When the firm closed, the experience May gathered already helped him to start his own firm in 1834, in partnership with J. I. Picket and T. S. Grimwade. Mr. Picket died within one year of the establishment, while Mr. Grimwade retired to firming in 1839, who "did not care for cooking chemicals". So, May have to proceed on his own.

Later May was joined by William Garrad Baker (24) who was an apprentice in his father's business of Chemist and Druggist. They started their business by buying their own premises at Golden Wharf where the manufacturing and dispatch side was looked after by William Garrad Baker and John May did the traveling which mainly consisted visits to the London Wholesale market thus the introductory part of a company is found. This was soon famous through the world.

Rhone Poulenc: During the world war May and Baker in association with the establishments of Poulenc Feres got stronger, as they were appointed to manufacture arsenic compounds. In 1923 the agreement of Poulenc's ownership over May & Bakers' ordinary share were drawn up, and was presented before the board in June 1927. The result was that Poulenc ended up with 85% of May & Baker's total capital and 90% of their ordinary shares. Thus instead of May & Baker their firm was labeled as Rhone-Poulenc, later Poulenc Freres merged with the Society des Usines du Rhone in France. In 1928 Phone-Poulenc became the largest manufacturer of organic chemicals in France, with 3,000 employee in the following years, it became a story of merger and accusations, Thus May & Baker became a subsidiary of Rhone-Poulenc, though for many years it was operated in its old name. The firm expanded in many countries, under different names, until its global presence by the name Rhone-

AVCILLIS

Poulenc. By the turn of the century, a lot of change started taking place because of the market expansion, specialization, international collaborations etc.

Rhone Poulenc Rorer: It is a recent creation, which emerged as a result of the combination of two Pharmaceutical Companies. Because of this merging Rhone Poulenc Rorer now is among the first lifteen pharmaceutical companies in the world. In 1991, organizationally the merging completed and created a unique global structure, not belonging to any particular country-neither French nor American, but global. The business is now focused solely on pharmaceutical prescriptions, over the counter and hospital products, divesting non-strategic assets and business. Rhone-Poulenc Rorer is a recent creation. It also presents a unique twist in the consolidation that was scoot the industry during the past few years.

The completion of merge in 1991 created a unique global structure--neither French nor American- but global. Randy Thurman in USA jointly holds the office of the president and Jean Jecques jointly holds the office of the president Bertrand in France. They establish an operating committee, a global team of senior executives representing Rhone-Poulenc Rorer (RPR) key markets and business. RPR's business is now found solely on pharmaceutical prescription II Over the Counter" and hospital products divesting non-strategic assets and business in financially beneficial and socially responsible ways. It operates in all the 140 countries that the Rhone-Poulenc originally operates. There is a foundation name Rhone-Poulenc Sante, headed by Rigor Landau, which operates since 1987 in all the 140 countries to promote cooperation between all that works for progress in the world of health care.

Rhone-Poulenc Rorer in Asia Pacific

Rhone-Poulenc Rorer operates in 17 countries of Asia Pacific. The countries are:

- 1. Australia
- 2. Bangladesh
- 3. China
- 4. South Korea
- 5. Hong-Kong
- 6. India
- 7. Indonesia
- 8. Japan
- 9. Malaysia
- 10. New Zealand
- 11. Pakistan
- 12. Philippines
- 13. Singapore
- 14. Sri Lanka
- 15. Taiwan
- 16. Thailand and
- 17. Vietnam.

Each country has both commercial office and local factories. In Southeast Asia the regional head office is located in Singapore and also governed & controlled by head office situated in France.

Rhone Poulenc Rorer Bangladesh Limited: Till 1947, the Indian sub-continent has received May & Baker products either manufactured by or imported through the Indian liaison company for May & Baker. Indian independence in 1947 created the problem of supplies for Pakistan.

From 1947 to till 1960, West Pakistan and the East Pakistan received supplies directly form Dagenham, UK. In 1958, May & Baker began discussion with the government-sponsored Pakistan Industrial Development Corporation to establish a joint company. The Corporation wanted May & Baker as partner in a joint company with a factory located in the then East Pakistan as part of the government's decentralization program.

After lengthy negotiations, In 1958 it was decided that May & Baker would establish a joint venture company in East Pakistan (i.e. present Bangladesh). The Pakistan Pharmaceutical Industry (PPI) was incorporated in 1960, with the 60% share owned by May & Baker Dagenham, UK, and rest 40% by the then Pakistan Government. In 1962, manufacturing of pharmaceutical formulating started at Tongi plant. Following the independence war of 1971, resulting in the emergence of independent state of Bangladesh, the factory built up serve for a population of 150 million, was in the middle of a country with just over half that population, and lost 60% of its market. Ultimately, the Bangladesh Chemical Industries Corporation (BCIC) became the owners of 40% of the company's shares, May & Baker retrain 60%. PPI became Bangladesh Pharmaceutical Industries (BPI) Ltd.

In 1974, the company took over the assets and liabilities of May & Baker's branch in Bangladesh and started its own marketing and distribution. In 1978, the company started its Animal Health Division (manufacturing & marketing). Then the company started repackaging and marketing Agrochemical in 1979.

In 1982, the Bangladesh government introduced Drug Policy banning a large number of products and formation harmful or unnecessary. Because of this, May & Baker (BD) Ltd. lost 40% of the turnover and two of its plants shut down.

In 1989, as part of the global unification program, the company took the new name Rhone-Poulenc Bangladesh Ltd. with same equity participation. During this period it had three operational divisions namely pharmaceuticals, Animal Health and Agrochemical. Rhone-Poulenc again got a new name Rhone-Poulenc Rorer after the completion of its merger in 1991, with Rorer Inc., an. USA based Pharmaceutical Company. The local company, Rhone-Poulenc (BD) Limited also became Rhone-Poulenc Rorer (BD) Ltd. in 1995 after the completion of all legal process to change its name. To maintain its compatibility with Rorer, the company separated its Animal Health and Agrochemical division, jointly known as agrovet division, from its pharmaceutical division. Our concentration will be on Pharmaceutical division only.

Again in January 1995, the human pharmaceutical business of Rhone Poulenc Bangladesh Ltd. renamed itself Rhone Poulenc Rorer Bangladesh Ltd. as a present Rhone Poulenc Pharmaceuticals division merged with Rorer Inc. of USA. In a global move Rhone Poulenc Rorer has acquired the business of Fisons Ltd. and together

RPR and Fisons are better equipped to meet the needs and marketing demand. In Bangladesh both Rhone Poulenc Rorer Bangladesh Ltd and Fisons (Bangladesh) Ltd. had a strong presence and had their professional services. They were providing the service while maintaining their separate legal identities. The manufacturing part of RPR in Bangladesh is done both at RPR and Fisons factories at Tongi.

The annual turnover of the house is around Taka 1500 million and brands around 80 we the range of presentation, to meet the different patient needs. RPR-Fisons in Bangladesh is ranking third in the Bangladesh Pharmaceutical Market, has to compete against around 200 companies. After successfully creating belongings and teamwork between RPRBL and FBL: sales team members through co-promotion, the groups have integrated the sales team in 1998 for promoting a unified product line. Rhone-Poulenc Rorer Bangladesh limited is a leading exporter of Pharmaceutical Products of the country. The Government of Bangladesh awarded the company for excellent performance in exporting Pharmaceutical products during the financial year of 1997-1998. In the Pharmaceutical sub-sector under chemical sector, Rhone-Poulenc Rorer Bangladesh Limited earned US \$ 4.34 million by exporting Pharmaceutical products in 1997-1998 which was 43.42 percent higher then the previous year. Contribution of the company to export earning from this sector in the aforesaid year is 5.84 percent.

Integration Process: Before going to organizational profile and functions, it is important to discuss about the integration process of RPRBL and FBL. Any integration/merger exerts some positive or negative impacts on the employees and turnover of the respective organizations. So the integration process requires utmost care and sincerity from top management. Integration process started between RPRBL and FBL after the acquisition took place, which is still going on. Management expectation is to complete the process by December 1997.

The combination of both RHONE-POULENC and HOECHST pharmaceutical businesses on a worldwide basis will create numerous opportunities of synergy's, resulting in an improved global performance that will have positive impacts in all the territories where the companies are active, including India.

Through the whole process the turnover of the house did not decrease rather it is increasing, which indicates the efficient handling of the process and the credit must go to RPR's top management. Another important factor of the integration process is the effect of synergy (i.e. in expenditure side 2+2=3, and in revenue side 2+2=5). Yet there are some confusion and frustration among the employees, which may affect their motivation. Management should make them clear about the policy as early as possible to maintain their motivation. Before acquisition, the two organizations have separate policy, structure, philosophy etc. However, here only the integrated organ gram will be presented including functions of various departments and other characteristics of the organization.

On December 16, 1999 Hoechst Marion Roussel and Rhone Poulenc Rorer merged globally to create Aventis Operational integration of RPR and HMR in Bangladesh has been completed. Production facility of HMR has been shifted from Chittagong to RPR plant at Tongi.

AVCIILIS

After successfully creating belongings and teamwork among RPR, HMR and Fisons sales team members through promotion, the group emerged as integrated one of the largest sales team.

With the current plants to restructure the company, increase sales force numbers, put more resources on promotion & other medico marketing activities and the existing range of new products in the pipeline at short and medium term, the group is poised to make the "quantum leap" in the very near future.

Ambitious Growth Target: AVENTIS PHARMA has set a sales growth target in the mid-high single digit for each of the next several years, excluding the impact of genetic competition on the anti-hypertension drug Cardizem ® that began in mid-1999.

AVENTIS PHARMA sales of the year 2000 are Tk. 1682174. Market growth is 26% and market share achieved is 9%. Stands 3<sup>rd</sup>. in the rating of

AVENTIS PHARMA has set a target of achieving 750 million Euro in merger synergies by the end of 2002, accounting for a significant portion of the overall savings target of 1.2 billion Euro for all of AVENTIS. AVENTIS PHARMA to achieve this target by rationalizing activities in manufacturing, administration and Drug Innovation & Approval to maximize effectiveness and eliminate unnecessary duplication AVENTIS LAUNCH.

## ORGANIZATIONAL HIERARCHY<sup>1</sup>

  - Prescription collection all over the month.
  - 46 Medical Representatives do this job.

ATTOTICIS

- Month end report of the research.
- Report sent to Depot meeting for further analysis of the sales performance.
- Competitive analyses are done.
- Arranging research agencies to conduct curtail and exclusive research.
- Arranging research agencies also to work in disguise to evaluate the field worker and take corrective action.
- Aventis Pasteur: Headed by Manager Aventis Pasteur Mr. Ishtiak sajjad of his own. This is considered as a separate business unit.
  - Work with six vaccines
  - Operates in 90 countries.
  - · Through distributor.

**Diabetic Care:** Diabetic care is a new business unit Headed by Dr. Afroz Jalil started from June 2001. It is excepted to operate from January 2002. It is also an individual business unit. Now its already preformed and intended to perform functions are:

- General team training. It trained 69 people.
- Intends to train 60 team leaders.
- Target first the doctors of Diabetic Hospital, as it is a product that can not be targeted to the end user directly.

## **▲** Industrial Operations Division:

This department controls the overall production and headed by Director Industrial operation N. S. Rahman. Each plant (RPR and FBL) has some functional departments headed by manager. These are:

- **❖** Factory Manager
- Industrial Operation
- ❖ Industrial Relation
- **❖** Engineering
- Quality Assurance
- EHS (Environment, Health and Safety)
- Stores And Despatch

These departments are working to provide:

- Overall Supervision of the plant.
- Maintain the working hour.
- Maintain the labor hour.
- Employee management (motivation).

- Raw material proceeding.
- Machine maintenance
- Quality maintenance.
- Assuring Environment, Health, and Safety.
- Proper Storage Facility.
- Proper despatch of product.

There are three different Plants for RPR. Fisons and Hoecest in Station road, Tongi, Gazipur. All these produce a combination of different classes of product Tablet, Capsule, Injection, Vial, Syrup, Sterile, Elixir etc.

Factory use GMP (Good Manufacturing Practice) Guideline to ensure standard by UK. First the implementation went through documentation system of GMP. Control Document, which can effect the medicine quality. Testing method used to settled the format and content . the procedures are:

- Document Maintenance: Documents are numbered as department no in abbreviation. Document type number, sequence number and version number is coded.
- Training: Time to time training is done
  - A. Industrial Training includes:
  - Rules and regulation of the plant.
  - Health and Hygiene requirement.
  - Environment Health and Safety.
  - Introduction to basic GMP.

After training a test is taken in which 70% is the passing mark. Very few fail, the failures are sent for re-training program.

- B. Job Specimen Training includes:
- Both internal and external training.
- Fire Fighting training.
- Red Crescent training.
- Qualification and Validation:
  - A. The utility, equipment, procedures used. Process of cleaning will be documented.
    - For the doing this, a written protocol is there.
    - In the next step re-check by other three technical staffs.
    - After that executed.
    - Then result and report.
    - Again sent to the 3 technical specialists for approval.
  - B. Installation Qualification (where to locate, how to operate, maintaining the same procedure.)
  - C. Operation Qualification (through Protocol, same procedure).
  - D. Performance Qualification (same as before). For ex. Supplied water quality is checked strictly and routinely.
  - E. Process Qualification (same as before).

F. Critical parameters maintaining 3 batches should be made. For ex: a batch should be in a maximum to a minimum range, which is the standard.

Every 2 years an auditing is conducted by the Corporate Aventis. David Fox of United Kingdom on behalf of UNICEF conducted a standard auditing, then only they agreed to correspond with AVENTIS PHARMA.

#### **♠** Customer Services Division:

The previous Director of this department has changed and now new Director Customer and services has not yet taken the charge. There is a planning to change this division into supply chain management. Now as Planning and procurement division it has few departments each of which is headed by a manager. These are

- Planning & Procurement
- · Distribution
- Planning and Procurement Department: This department is headed by Manager Planning and Procurement Mr. A Islam. The jobs performed by this department are:
  - Ensure raw materiel and packaging materiel availability.
  - Maintaining at least three months inventory.
  - To send products to its twelve Depotts allover the country. .
  - To maintain good relationship with customers.
- ❖ Distribution Department: the head of the department is the Manager Distribution Mr. K. M. Mohsen. The job of the department is to
  - Serve the 13 Depots of our country.
  - Sales and Despatch
  - Update information of the sales and stock position
  - Concentration the packing requirements the customers.
  - Dealing with Wholesalers, retailers, and individual customers

RPR & Fisons have 68 brands (RPR=25, Fisons=43) with 134 presentation forms. But they import about 400 items of raw materials, which is 97% of total raw materials requirement

# AVCILLIS

#### **♠** Human Resources Division:

This division is headed by Director, Human Resources, Mr. Moshtaq Ahmed. This division has five departments. A manager heads each of the departments. These departments are:

- General Administration/Project
- Communication and Training
- Compensation
- Legal Affairs

- ❖ General Administration/Project: This department is headed by Manager General administration Mr. Q. O. Kabeer. The jobs done by this department are:
  - Safety and security of the employee.
  - Asset management of the company.
  - Vehicle fitness maintenance of the company.
  - Well fair of the company.
  - Food arrangement of the company.
  - All Logistic support.
  - Sales Depot security assistance.
  - General services (Telephone, Fax, e-mail, Photocopy, Residence telephone)
  - Relationship between employee and employer.
- ❖ Human Resources: Manager, Human Resource, Mr. Kazi Rakibuddin Ahmed now occupies this position. This is a newly created Position to make the Human resource Division to work more scientifically and efficiently. Mr. Kazi Rakibuddin Ahmed joined on 15<sup>th</sup>. October 2001. His job are:
  - Recruitment
  - Training and development.
  - Maintaining communication.
  - Motivation.
- ❖ Compensation: This department is headed by Manager compensation Mr. Nazmul haque. The work of this department is to:
  - Salary distribution.
  - Employee Payroll.
  - Employee database maintenance.
  - Field operation incentives.
  - Proficiency distribution.

- Legal Affairs: HR Executive Mr. Shahidullah does This job. The jobs of this department are:
  - All agreements, contracts done by the external office.
  - Extortion, Steal, Robbery, handling cases.
  - Deal cases like land claim.
  - Represent Aventis Pharma in metropolitan meeting.

### Medical Affairs Division:

This division is headed by Director Medical Affairs Mr. R. F. Khan. There are three sub-departments these are:

- \* Clinical Research CME/PMS.
- . CME.
- \* Regulatory Affairs.
- \* Research and Development.

Functions of this department are:

- Arrange Clinical Meeting, Seminar, and Publication.
- Literature of Packing manual.
- Gift samples.
- To sponsor and arrange doctor's symposium and seminar.
- To attend doctors queries-
- · Medical training to the medical representatives-
- Clinical trails of drugs-
- Ingredient ratio.
- Manufacturing process (drug study)
- Dossair preparation.
- Pharmaco-vigilance i.e. monitoring the side effect and contradiction of drugs.
- Registration of products.

Here one thing should be noted that probably Aventis is the only pharmaceutical company in Bangladesh, which is going to recruit a high level medical professional in a top management position. The reason is that centrally Aventis spends about 15% of its total sales revenue for Research & Development division, and most of its products are from its own R & D division.

## Part - 2

REPORT PART & ANALYSIS PART

## ₩ REPORT PART

#### **Internship:**

I started my Internship in Aventis Pharma (pharmaceutical company) one of the market leaders in Bangladesh pharmaceutical market that was created through the merger of Hoechst Marion Roussel of Germany, and Rhône-Poulenc Rorer of France a combination of the two large Pharmaceuticals Companies.

I had my access to the internship through the Human Resource Department Director who had a face to face interview with me before allowing me to the internship program on submission of my internship request and CV. HE assigned me to a very reverent field of my education. My concentration area was in International Business. And I was assigned to work for Export Unit.

There is a small export unit under Marketing and Sales Division operating competitively with other pharmaceutical companies of Bangladesh. My reporting boss was Mr. K M Tarique. He helped me learn the real life export activities by providing me the autonomy in daily work

For the first week I was provided the previous documentary files of the consignments to study before step in to the practical field, which helped me a lot. My boss Mr. K M Tarique also helped me to understand the things clearly. Thus now I have learned to be able to handle a complete transaction.

**Jobs Performed as an Intern Student:** The main Job of the Export Unit is to perform the Export work. Presently their export is limited to few countries like Myanmar, Sri Lanka, Philippine and Hong Kong. Export operation is done in against of L/C, Purchase Order, and Tender.

An Export Activity list is given that I used to Perform:

## On receiving order:

1. Prepare Proforma Invoice (PFI)

Which includes the terms and conditions that are supposed to be in fever of the company so that the transaction becomes smooth and the company is not in risk for this commercial transaction. These terms and conditions are in then transformed to LC clauses send by the Importer.

## On Receipt of LC:

- 1.Inform Planning and Procurement
- 2. Inform factory for Production (Internal order form)

#### **After Production:**

- 1. Know form the production (ask for packing list)
- 2. Format the packing list according to the LC clauses.
- 3. Ask from Quality Assurance for Certificate of Analysis.

Report

AVEILLIS

- Prepare Invoice (according to the LC Clauses)
- 5. Prepare Packing list (according to the LC Clauses)
- 6. Inform Insurance Company for proper coverage.
- 7. Contact Freight Forwards Agency for Airline booking.

#### Bank Work:

- Prepare Export Form (EXP) for export permission.
- 2 LC copy Attachment from bank
- 3. Collect CIF Certificate from bank.

#### Document required for the factory:

- II Prepare MUSHAK and Application for customs clearance.
- 2 Send this to Factory.

#### Clearing and Forwarding Agency:

Provide the agency necessary documents as:

Invoice,

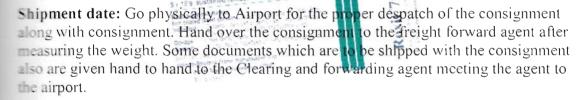

Packing list,

LC (original),

Export Licence (10-A),

EXP with CIF Certificate,

VBF-9 Form for Airport Customs clearance.

## After the shipment:

- 1. Send a set of the documents through courier service and Fax the same (according to
- 2 Send the Air Way Bill (AWB) to the Insurance Company with other necessary documents.

## Documents for the factory:

1. On receiving the documents back from the customs send those to factory (as specified)

#### Finally:

1. After receiving all the relevant papers make a full set of paper and sends it to bank for payment.

This is the formal ending of the transaction. Other then this a lot of relevant works comes up in-between the work. Collecting the Credit advice from the bank maintaining those sequentially. Send those to the legal authority. Such as many post export works are there.

m Report

## AVCILLIS

#### **Project Assignment:**

The prospect of Pharma export appears to be promising, because most of the South Last Asian countries are largely dependent on imports. Whereas Bangladesh is a well eveloped and growing country of pharmaceutical product. Aventis Pharma and some the domestic firms are capable enough to feed the neighbor countries. Since entis Pharma has the initial skill to export and maintaining good reputation in the market upto now, it is expected to be successful in the future new ventures

Though Aventis Pharma of Bangladesh exports only to a limited market and the sport volume is also low, it has tremendous potential to grow its export business both in markets and volume. Therefore to boos up the Export I was assigned a terms project on "Competitive analysis of the Pharmaceutical Companies of Bangladesh, involved in export", as a requirement of my internship program.

Being an affiliate of the global multinational company, Aventis Pharma of Bangladesh has huge resources, which is one of their competitive edges over the thers. Now they have to find out the following issues for the export promotion in the competitive market:

- \* Aventis Present position in the market.
- \* Aventis intended target to be achieved.
- How do they get there?

## Objectives of the Study:

The objectives of the study is to understand the following:

- 1. Know Pharmaceutical Export potential from Bangladesh.
- 2 Know competitive situation of Pharma exports.
- 3. Explore future Export opportunity for Aventis Pharma.
- 4. Understand registration requirement for different countries.

Information required for the Study:

In order to achieve the study objectives. The following information were essential:

- ✓ Identify the companies engaged in export business.
- ✓ Name and number of products registered by each company.
- ✓ Sales volume of these companies by country.
- ✓ Lists of export markets (countries) of these companies.
- Companies have their own overseas marketing operation and where?

Report

- AVEILLIS
- ✓ How organized the sales force, their size, sales network?
- ✓ Size and strength of export departments/units of the competitive companies
- ✓ Size of Aventis Pharma's Export unit and Strengths/Weaknesses.
- ✓ Other potential countries for export.
- ✓ Country risk analysis.

After conducting the study this report hopefully would be able to provide a guideline for export unit of Aventis Pharma of Bangladesh to remain competitive in the market and necessary steps that can be taken for the promotion of the export.

#### Sources of Information:

This study is mainly field oriented. There are lots of pharmaceutical companies but only the leading companies involved in export are the main sources of primary information for conducting the study fruitfully.

Other sources of information are Directorate of Drug Administration and Export promotion Bureau (EPB)

#### Limitations of the Study:

The limitations of the study are provided, as they are faced from time to time.

#### Methodology of the Study:

This study required both primary and secondary data to analyze the competitiveness of the exporting pharmaceuticals of Bangladesh.

Report

#### EXPORT UNIT

#### The Concentration Part of the Study Export

main concentration of the project is the Export Department. This export unit was under Marketing and Sales Division. This Export unit is headed by Manager Front Mr. K. M. Tarique. The main task of this unit is to export the Pharmaceutical reducts to the foreign countries. This unit is exporting to the foreign countries respectively for few years. But what can be seen that there were frequent changes in authority in the managerial level of the unit during its operation time. Firstly Mr. Schadat Hossain was the Export Manager. He successfully performed the export relations in the following countries:

- **I**Myanmar
- 2 Sri Lanka
- 3.Phillipine
- 4 Hong Kong
- 5 Moritious

These are the countries where only RPR Products were exported except Sri Lanka. For FBL products, the importing countries were:

- **I** Bhutan
- 2 Nepal
- 3.Srilanka.

Fisat

Shahadat Hossain continued up to the first of 2001. When he retired, for a very time Mr. Mamoon took the charge. Within this time the export operation shrunk some of the market were lost.

May 7<sup>th</sup>. Mr. Tarique took the charge of the Export Departments. He found the exponding only four countries. Those are:

- **M**yanmar
- 2.Sri Lanka
- 3. Hong Kong.
- 4.Philippine

term street, the street, the street, s

60 H/I

boost up the export Mr. Tarique did some new product registration to Sri Lanka both RPR and FBL. Which will get its operation approval within first of 2002. Other then that he had a visit to Myanmar to recruit new medical representative to do everseas marketing job for Aventis Pharma. In Myanmar there were also some product registration done for both RPR and FBL. These new products are expected to get its operational approval within first of 2002.

Presently their export is limited to few countries operating competitively with other maceutical companies of Bangladesh. Now they are intended to explore the field

AVEILLIS

peration and require necessary information regarding this. Recently Mr. K. M. Tangue will take part in Nepal Fair, a week package program of from 1<sup>st</sup>. to 7<sup>th</sup>. The part of the then that a France based company SIDAPHARMA already agreed to from Aventis Pharma of Bangladesh. It is expected they are going to import and some quantity. It should be mentioned that Aventis Pharma got the Export phy in 1999 amongst the operating pharmaceutical firms of Bangladesh. Therefore is a hope to get back the position if proper strategies are undertaken.

#### THEME

Pharmaceutical market is a growing one, i.e. it is in the growth stage. Therefore exploration of the Industry is a must. Specially when not only people but also perment, WHO (World Health Organization), UNICEF are more concerned about approving human health by decreasing death rate. Therefore the potentiality of the pharmaceutical products seem to be huge.

The prospect of Pharma export appears to be promising, because most of the South East Asian countries are largely dependent on imports. Whereas Bangladesh is well developed and growing country of pharmaceutical product Aventis Pharma and some of the domestic firms are capable enough to feed the neighboring countries. But in the market Aventis Pharma is facing tremendous competition with the domestic firms. Because of:

- 1. Infant Industry Argument<sup>2</sup>: Government regulatory obligation to boost up domestic Pharmaceutical products. That's why in the year 1982 Government imposed a new rule to register product for Multinational foreign companies. Other then this the foreign firms were restricted to sell Vitamins and Antacids products.
- 2. Government Incentives: Government arranged World Bank Matching grant Facilities (MGF) for the exporting companies.

Therefore Aventis Pharma is now having high competition with the companies like SQUARE, BEXIMCO, NOVERTIS, ACME, and so on. In such situation Aventis Pharma is under the threat until the implementation of GATT (General Agreement on Tariffs and Trade) up to the year 2005.

Since Aventis Pharma has the initial skill to export and maintaining good reputation in the export market up to now, it is expected to be successful in the new ventures. The growth is slow but cannot be ignored, because the forecast for the year 2001 is already achieved and even exceeded.

Infant Industry Argument: Argument in favor of government intervention in trade- a nation should protect fledgling industries for which the nation will ultimately process a comparative advantage.

## MAIN ISSUE

new strategies can Aventis Pharma undertake to expand the export operation highly competitive and conservative market?

## AVCILLIS

## <u>ANALYSIS</u>

order to carry out the study on "Competitive analysis of the Pharmaceutical impanies of Bangladesh, involved in export" four extensive analysis was done:

- 1. Data Analysis: This study is a combination of both of primary data (questionnaire) and secondary data (EPB, Drug Administration). These ways of collection of the data which helped to provide the viability of the study.
- 2. Country Risk Analysis: This study will provide an insight of feasibility for export business in the remaining countries and choose for future potential ountries to do business.
- 3 SWOT Analysis: This study will provide the internal strengths & eaknesses and External Opportunities & Threats for Aventis Pharma.
- 4. Alternative Analysis: On light of the study some alternatives were chosen and analyzed to see whether the they are feasible enough to be implemented to solve e current crisis of the export unit of Aventis Pharma

Tivericis

#### Data Analysis

the main part of the study, as this will help Aventis Pharma to understand competitors. From this analysis Aventis Pharma will able to find out its real precitors. And who to bench mark. For conducting the study

#### Secondary Data Analysis:

make a fresh start the secondary sources of data are collected primarily. This med me to focus on the basic needs for the study. To conduct the study I chose Promotion Bureau (EPB) and Drug Administration. Both of the institutes were forwarding letter<sup>3</sup> from my reporting boss Mr. K. M. Tarique

Export Promotion Bureau): EPB was a great help as a smooth start. I met Mrs. Sufia Akhter Khatun, who is the Deputy Director of EPB. Having the study able to sort out the main competitor i.e. the main Firms involved in Export.

- SOUARE
- **BEXIMCO** Pharmaceuticals Ltd.
- **3 NOVERTIS**
- ACME Laboratories Ltd.
- 5 Jayson Pharmaceuticals Ltd.
- & ACI Ltd.
- T. Glaxo Wellcome.
- \* OPSONIN Chemical Industries Ltd.

Pharmaceuticals of Bangladesh is still an infant industry. According to EPB Exported Products are classified into two categories, they are:

- A Primary Commodities.
- Manufactured Commodities.4

maceutical product comes under Exported Manufactured Commodities in the subsection of Chemical products among the 10<sup>th</sup> commodities. In the given statistics it is that Chemical products are only 1.49% in the fiscal year 1998-99 of the total manufactured commodity which increased in the fiscal year 1999-2000 to 1.63 the pharmaceutical products were only 0.13%, which decreased to 0.10% during fiscal year 1999-2000. The total exports of Pharmaceutical Product in the fiscal 1999-2000 were US \$5.59 Million. It is 5.97% among the Chemical Product. But the product is the third best exporting Commodity amongst the 10 mical Products.

Forward Letter: attached as Appendix-B

Manufactured commodities: EPB List attached as Appendix-C

**Export by Destination**<sup>5</sup>: according to EPB information the Pharmaceutical products are exported to 32 countries. Among the Importer USA in the top of the list they import 30.37% of the total Pharmaceutical Export. Pakistan in the 2<sup>nd</sup> position imports 17.17%, Yemen 10.81%, Myanmar 7.45%, Sri Lanka 4.89%, Iran 4.74%, Vietnam 4.28%, Russia 3.05%, Austria 2.57%/, Nepal 2.43%, Japan 2.21%, Ukraine 1.87%, Malaysia 1.69% and Djibuti 1.21%. and rest of the countries are not significant buyer as they are importing less then 1%.

**Export Price List<sup>6</sup>:** EPB provided some offered Export Price List of Square Pharmaceuticals, Beximco Pharmaceuticals Ltd. Acme Laboratories, Jayson Pharmaceuticals and Essential drugs company Ltd.

**Drug Administration:** Drug administration was a big help in collecting the secondary Information. Drug Administration provided the list of exporter of Pharmaceuticals Products of Bangladesh other then Aventis Pharma for the year 2000, they are:

- 1. Square Dhaka
- 2. Beximco Pharmaceuticals Ltd. Dhaka
- 3. Beximco Infusion Dhaka
- 4. Novertis Dhaka
- 5. Acme Laboratories Ltd. Dhaka
- 6. Jayson Pharmaceuticals Ltd.
- 7. ACI Ltd.
- 8. Glaxo Wellcome. Chittagong.
- 9. Opsonin Chemical Industries Ltd.
- 10. Aristo Pharma Dhaka
- 11. James Pharmaceuticals Dhaka
- 12. Opso Saline Ltd. Barisal
- 13. Global Capso Limited barisal
- 14. Ganasutra
- 15 EDCL Dhaka
- 16. Medined Pharma.

export information of the chosen eight companies' collected from Drug mistration and with the approval of Manager Export Mr. K. M. Tarique are given

Square has submitted their export information to Drug Administration in a sell. Square is the in top of the list in Export. Their total export for the year 2000 \$2875928.16

by destination: Appendix-D
Price List: Appendix-E

<u>Limitations of the Secondary Sources:</u> These are all the data collected from the Secondary sources. The secondary source information cannot be considered to be very helpful to conduct the whole study. This only provided the guideline to proceed further. The limitations of studying the sources were:

- 1. The information were collected from the government offices, were access to the data were not smooth, because of the bureaucratic problems. It was really time consuming process to get approval to go for the statistical information. I had to pass a few tables with my forwarding letter that took more then a week.
- 2. After getting the approval the person I met was Mrs. Tahera Begum of export section of Drug Administration. To provide the information she took few more days, whereas it was easy for her to provide instantly. Finally she asked for bribe to help me.
- 3. Even after completing these formal and informal procedures the data were found not to be in well arranged format. As such some of the companies are found not to submit there data for the recent year. Some companies did not submit the details of the information.
- 4. The data collected were found in various formats. Some didn't provide the total export in figure, some didn't mention the Product name, and some are found in different fiscal year.

Considering these the secondary data can be used only for the verification of the Primary data collected.

# Primary Data Analysis:

To conduct the competitive analysis the primary data were the main sources to deal with. This job was done in disguised as an East West University Student who is pursuing a course International operation. This project work was placed as the course requirement of the university. My University was a big help by providing me the forwarding letter<sup>7</sup> to conduct fieldwork.

To get accurate, relevant, and standardize data a questionnaire survey was done. The questionnaire comprises of eleven questions, among which nine are close-ended questions and two are open-ended questions. This survey can be considered to be reliable enough because the collected data are provided by the organization itself.

**Questionnaire Analysis:** first the questionnaire has three basic information:

Name of the Company

Name of the attendant of the Questionnaire

Designation of the attendant

After that the eleven questions came in sequence.

<sup>8</sup> Questionnaire: Appendix-G

<sup>&</sup>lt;sup>7</sup> Forward letter: Appendix-F

- / NVCIICI.

**Question Number 1:** When you have started exporting? (Close-ended question)

SQUARE Pharmaceuticals Limited during early 90s

BEXIMCO Pharmaceuticals Limited during early 90s

NOVERTIS (Bangladesh) Limited during early 90s

JAYSON Pharmaceutical limited during 1995-1996

ACME Laboratories during1995-1996

OPSONIN chemical Industries Ltd. answered during1999-2000

GLAXO Wellcome during1997-1998

ACI Ltd. during1997-1998 &

Aventis Pharma during 1995-1996.

**Analysis result:** Jayson, Acme, Aventis started during 1995-1996, Glaxo and ACI started during 1997-1998 whereas Novertis, Beximco, Square started in early 90s and Opsonin started during 1999. That means Aventis is not new in the market and should export with more effort.

**Question Number 2:** In which of the countries the export operation is done, Please specify the best selling five products in accordance to their priority. (Close-ended question)

**SQUARE Pharmaceuticals Ltd:** Export to Pakistan, Myanmar, Sri Lanka, Nepal, Russia, Ukraine, and Kosova.

**BEXIMCO Pharmaceuticals Ltd:** Export to Pakistan, Myanmar, Vietnam, Kenya, Singapore, and Yemen.

50 m suspension

- 2. Doxycycilin
- 3. Amoxycillin
- 4. Ciprofloxain USP 250mg
- 5. Multi vitamin

# Vietnam

\_ Negligible

**Opsonin Chemical Industries Ltd.** kept their export pending. Because they are setting up their plant as required to ISO 9001 approval. Now they are in the process to corresponding to the potential foreign importing countries and doing the product registration part. The countries in which they are registering their products are:

Pakistan

Myanmar

Sri Lanka

Nepal

Philippine

Vietnam

UAE

UAE is their old customer and also now continuing the business, but not in significant amount. From the secondary sources it was known that they had a large transaction to Yemen recently. Here it is to mention that it is not a continues business.

ACI Limited Export to Pakistan, Myanmar, Sri Lanka, Nepal, and Philippine.

#### Pakistan:

- 1. Avloref Cap
- 2. Avlozef Drop

# 181011010

#### Myanmar:

- 1. Skinalar Oint
- 2. Skinalar Cream
- 3. Aceitrin Tab
- 4. Avlotrin Tab
- 5. Xantid Tab

#### Sri Lanka:

1. Oralon M Rize (Not Clear)

Nepal and Philippine having negligible amount of export.

**Glaxo Wellcome** exports very little. Their main export plant is in Chittagong. The questionnaire was attended by Manager MIS. He informed only one product exported in a single country.

#### Myanmar

1. Ventolin Tab

**Aventis Pharma** Exports to Myanmar, Sri Lanka, Philippine, Mauritius, and Hong Kong

#### Myanmar

- 1. Metronidazole 200mg.
- 2. Metoclopramide Hydrochloride Tab
- 3. Zopiclone Tab
- 4. Prochlorperazine mesylate/maleate
- 5. Metronidazole Suspension

#### Sri Lanka

- 1. Chlorpromazine Hydrochloride
- 2. Metronidazole
- 3. Prochlorperazine mesylate/maleate

# Philippine:

1. Prochlorperazine mesylate/maleate

#### Hong Kong:

1. Mepyramine Maleate 2%

**Analysis Result:** All the companies are having their business almost in the same countries. For Aventis, to operate in Myanmar, competitors are Square, Acme, and ACl, to operate in Sri Lanka, competitors are Beximco and Glaxo and to operate in Hong Kong, Novertis is the main competitor. None of the companies are now in

Philippine and Mauritius yet. But the same Products don't compete in the same country. There fore there is no real competitor. In fact India is the main competitor of these Companies.

**Question Number 3:** Do you have any overseas marketing operation if so where (Please Specify): (Open-ended question)

SQUARE Pharmaceutical has in Pakistan.

BEXIMCO Pharmaceutical has in Myanmar and Pakistan.

NOVERTIS (Bangladesh) Limited didn't answer this question.

JAYSON Pharmaceutical limited said yes. Didn't answered this question for 1995-1996

ACME Laboratories doesn't have any

OPSONIN chemical Industries Ltd. Yet don't have any

GLAXO Wellcome doesn't have any as their operation is expanded to many other countries, they can't compete their other subsidies.

ACI Ltd. don't have any

Aventis Pharma have their overseas marketing operation in Myanmar.

Analysis result: Beximco and Aventis both have their overseas marketing operation in Myanmar. Whereas Beximco and Square have operations in Pakistan.

Question Number 4: Total number of Products being exported. (Close-ended question)

SQUARE Pharmaceutical Limited exports more then 50 products.

BEXIMCO Pharmaceutical limited exports more then 50 products.

NOVERTIS (Bangladesh) Limited exports less then 10 product

JAYSON Pharmaceutical limited refused to answer.

ACME Laboratories exports 50 above.

OPSONIN chemical Industries limited preparing for exports less then 10 products.

GLAXO Wellcome exports less then 10 product.

ACl Ltd. exports less then 10 product.

Aventis Pharma exports 50 above.

**Analysis result:** ACI Glaxo and Novertis exports 10 or less then 10 products whereas **Aventis Pharma**, Acme, Beximco, and Square exports more then 50 products. All other exports less then 10 Products.

Question Number 5: What are your expected sales (in Taka) for the year 2000/2001? (Close-ended question)

BEXIMCO Pharmaceutical Limited expects to sale 6 crore to 10 crore taka.

SQUARE Pharmaceutical Limited expects to sale 6 crore to 10 crore taka.

NOVERTIS (Bangladesh) Limited expects to sale 1 crore to 5 crore taka.

JAYSON Pharmaceutical limited refused to answer.

ACME Laboratories expects to sale 1 crore to 5 crore taka.

OPSONIN couldn't answer this, as they are now not doing any. From the secondary sources of Drug Administration for the fiscal year 1998-1999 was reported as US \$108762 10

GLAXO Wellcome expects to sale Zero-1 crore taka.

ACI Ltd. expect less then 1 crore taka.

Aventis Pharma expects to sale 1 crore to 5 crore taka.

Analysis result: The total export is 1-5 crore for the maximum companies. Beximco and Square expects to export 6 to 10 crore taka. Aventis exported upto now 1 crore and 11 lack taka.

Question Number 6: Who are considered to be your main competitor? (Close-ended question)

SQUARE Pharmaceutical limited considered Novertis as main competitor BEXIMCO Pharmaceutical limited considered India to be there main competitor. In country they sometimes consider Square.

NOVERTIS (Bangladesh) Limited only considers Square as their competitors JAYSON Pharmaceutical limited considers Square, Beximco, Novertis, and Aventis as their competitors.

ACME Laboratories considers Square, Beximco, and Jayson as their competitors.

OPSONIN considers Square, Beximco, Jayson, Acme and Aventis as their competitors.

GLAXO Wellcome considers Square, Beximco, and Aventis as their competitors.

ACI Ltd. considers Square, Beximco, Jayson, Acme and Aventis as their competitors.

Aventis Pharma considers Square, Beximco, Novertis, Acme and Jayson as their competitors. In fact the main competitor can be sought out after analysis of the study.

Analysis result: Square is the market leader. All the companies consider India to be their main competitor. At home in-between the companies there is almost no competition as all are individually working in different countries with different products. Many consider Square as their main competitor.

<sup>&</sup>lt;sup>10</sup> Reported Export information to D.A by Opsonin. Appendix-l

**Question Number 7:** How many personnel are working directly in your division/department/unit/ (Please Specify): (Close-ended question)

SQUARE Pharmaceutical Limited has its own department of export where 5-10 personnel are working.

BEXIMCO Pharmaceutical limited has its export department where less then 5 personnel working.

NOVERTIS (Bangladesh) Limited has less then five. In fact they don't have any separate export unit.

JAYSON Pharmaceutical limited has separate export department and has less then five (four) personnel.

ACME Laboratories has separate export department and has 5-10 personnel.

OPSONIN Chemical Industries created separate export department willing to recruit 2/3 personnel.

GLAXO Wellcome has separate export division and has 10-20 personnel.

ACI Ltd. considers has separate export unit and has less then 5 i.e. 3 personnel.

Aventis Pharma has separate export division and has less then 5 personnel.

Analysis result: Jayson has export department of four personnel, Acme has their export department involving 5-10 personnel. Glaxo has an entire export division in Chittagong, which has 10-20 people. ACI export unit has 3 personnel working for export. Square has 5-10 personnel in its Export Department. Beximco export department has 4 personnel working. Whereas Aventis Pharma has only one Export manager for the total export work.

**Question Number 8:** Potential Countries for Export in future (Please specify). (Open-ended question)

SQUARE Pharmaceutical targeted Philippine, Yemen, Cambodia, Kenya, Nigeria, Vietnam,

BEXIMCO Pharmaceutical targeted Philippine, Cambodia, Southeast Asia, and African countries.

NOVERTIS (Bangladesh) Limited targeted Approximately 60 countries.

JAYSON Pharmaceutical limited did not attend this question.

ACME Laboratories targeted Philippine.

OPSONIN Chemical Industries targeted Pakistan, Myanmar, Sri Lanka, Nepal, Philippine and Vietnam.

GLAXO Wellcome did not attend this question.

ACI Limited answered not applicable.

Aventis Pharma targeted Nepal and France as their next exporting countries.

**Analysis result:** Novertis targeted 60 new countries for the future operation, i.e. they are going to be a big competitor for the industry. It is a time consuming procedure to get registered therefore it is certain they will enjoy competitive edge and may erase some of the some of the Pharmaceutical companies' name from the export market.

Square, Beximco, Acme and Opsonin targeted Philippine, which is the most potential country for export, because EPB recently had an agreement with the Embassy of Philippine 11. Kenya, Nigeria, Yemen, Cambodia, Vietnam, are also the potential most countries.

# **Question Number 9:** The Payment method of Export. (Close-ended question)

SQUARE Pharmaceutical limited deals only the L/C based export.

BEXIMCO Pharmaceutical limited deals both the L/C and non-L/C based export.

NOVERTIS (Bangladesh) Limited deals only the L/C based export.

JAYSON Pharmaceutical limited deals both the L/C based and non-L/C based export.

ACME Laboratories deals only the L/C based export.

OPSONIN Chemical Industries will appreciate to deal only the L/C based export.

GLAXO Wellcome deals only the L/C based export.

ACI Limited deals only the L/C based export.

Aventis Pharma deals both the L/C based and non-L/C-based export.

Analysis result: Jayson and Aventis Pharma found to deal both L/C and non-L/C based export. This is the competitive age over the others, as bank commissions are not required to pay in the non-L/C-based export. But in case of non-L/C based Export Bangladesh Government has certain restriction about the payment method. It is one of the grounds of Export Policy<sup>12</sup> not to export on purchase order other then advance payment method. Beximco also found to export in both LC and non-LC (Advance Payment) based transactions.

# **Question Number 10:** The Shipment mode. (Close-ended question)

SQUARE Pharmaceutical Limited export through air and sea.

BEXIMCO Pharmaceutical limited export through air and sea.

NOVERTIS (Bangladesh) Limited export through air only.

JAYSON Pharmaceutical limited export through air and sea.

ACME Laboratories export through air only.

OPSONIN Chemical Industries will prefer to export through air and sea.

GLAXO Wellcome exports through road only.

ACl Limited transects through air and sea.

Aventis Pharma transects through air only.

Analysis result: Almost all the companies transect By Air. It should be considered that medicine products are very sensitive which requires good care and certain temperature to be maintained, on the other hand the shelf life is also very limited by the bottle products could be exported throng sea. Because the air freights charge is almost the 10% of the total consignment. Square, Beximco, Jayson and ACI, does

<sup>11</sup> Agreement with Philippine provided by EPB. Appendix-K

<sup>12</sup> Export Policy: Literature provided by Standard Chartered Bank. Appendix-

through sea also. Were as Glaxo exports to Myanmar through road. They are supposed to save a good deal of money, and have a better profitability and competitive advantage.

**Question Number 11:** How do you perform the Clearing and forwarding/Freightforwarding task. (Close-ended question)

SQUARE Pharmaceutical Limited Perform through agent.
BEXIMCO Pharmaceutical limited Perform through agent.
NOVERTIS (Bangladesh) Limited Perform through agent.
JAYSON Pharmaceutical limited Perform through agent.
ACME Laboratories perform the freight forwarding by them.
OPSONIN Chemical Industries will prefer to do these through agent.
GLAXO Wellcome performs through agent.
ACI Limited Perform through agent.
Aventis Pharma perform through agent.

**Analysis result:** Almost all the Companies are doing the Clearing and forwarding/Freight-forwarding task by agent. Were as only Acme is doing the Freight Forwarding task by them.. Thus Acme is saving a good percentage of commission that were supposed to be given to the agency.

Limitation of the Study: The main concentration of the study was to collect the primary data through direct interviewing. At the first phase it was found to be very hard and the access was never smooth. I went to the company as a student of East West University even though almost all the companies found to be very conservative in providing the information. Jayson totally refused at first. Beximco also did so in the first time. But those were collected by making random contact and also using personal sources and recommendations. Almost all the companies took long time in providing the information. I had to visit the companies over and over without loosing hope.

# **COUNTRY RISK ANALYSIS RANKINGS:**

EUROMONEY provides a full country risk rating based on nine individual variables. These nine includes economic data 25%, political risk 25%, debt indicator 10%, debt in default or rescheduled 10%, credit rating 10%, access to bank finance 5%, access to short term finance 5%, access to capital market 5%, and discount on forfeiting 5%. The computed total score is then scaled over 10lettered categories (AAA to N/R).

The political risk assessment is a single indicator created on a 0-10 scale (before weighting) derived from country experts, brokers and banking officers. It is specially derived as risk of non payment or non servicing of payment for good and services, loan, trade related finance, and deviants, and non repatriation of capital. Political risk is reported along with the full country risk index.

Their report also includes a corruption Perception Index, with data supplied by transparency International. *Euromoney* provide qualitative assessments for each of the countries it covers.

# Methodology: country risk:

*Euromony* has assigned its own sovereign rating on the basis of each county, s overall score. These ratings are:

- $\alpha \alpha (80.01-90)$ ,
- $4 \alpha (70.01-80)$
- **❖** βββ (60.01-70)
- ♣ BB (50.0 1 -60).
- **❖** β (40.01-50),
- $\star \chi \chi \chi (30.01-40)$
- **•** χχ (20.01-30)
- $4 \times \chi(10.01-20)$  and
- Countries, which score below 10.01, are not rated (N/R).

The overall score is established using nine weighted categories, which are calculated as follows:

The highest score in each category receives the full mark for the weighting, the lowest receives zero. In between figures are calculated according to the formula.

#### Final score =

Weighting /(maximum score - minimum score) X (maximum score - minimum score)

THEM KEDON

AVCILIS

The ranking shows the final scores after weighting.

The categories for ranking are:

**Economic data (25% weighting):** Take from *Euromony*'s Global Economic Projections. Each country scores the average of evaluation for 1997 and 1998.

Political risk (25%): Euromony asked risk analysis, risk insurance brokers and bank Credit Officers, to give each country a points between 10 and zero. A score of 10 indicates no risk of non-payment. Zero indicates that there is no chance of payments being made. Countries were scored in comparison both with each other and with previous years. Country risk was defined as the risk of non-payment, of non-Servicing of Payment for the goods or services, loans trade-related finance and dividends, and the non-repatriation of capital. This category does not reflect the creditworthiness of individual counterparts in any countries.

**Debt indicators** (10%): Scores were calculated using the following ratios from the Wood Bank World Debt Tables 1997: debt service to exports (A); current account balance to GNP (B); external debt to GNP (C). Scores are calculated by the formula:  $C \times (A \times 2) - (B \times 10)$  The score the better.

**Debt in default or reschedule** (10%): A score between 10 and zero based on the amount of debt in default over the past three years. Ten signifies non-payments: zero. In all default or rescheduled.

Crdit rating (10%): The average of sovereign rating from Mood's, Standard & Poor's and IBCA

Access to bank finance (5%): Calculated from disbursement of private. Long-term, non guaranteed loans as percentage of GNP.

Access to short-term finance (5%): Scores are calculated from taking into account membership of OECD consensus groups (Source: ECGD) and coverage available from the US Exim Bank and NCM UK.

Access to capital markets (5%): reflects *Euromone*'s analysis of how easily each country might tap the market now, based largely on bonds issues and syndicated loans. A score of five means no problem whatsoever; four no problems on 95% of occasions; three usually no problem two possible (depending on conditions); one, just possible in certain circumstances: zero impossible.

**Discount on forfeiting, (5%):** Reflects the average maximum tenor available and the forfeiting spread over risk less country such as the US. based on the average maximum tenor minus spread Countries for which forfeiting is not available score zero. Data were supplied in by Deutsche Morgan General Trade Finance, ING Forfeiting. London Forfeiting Company. SBV Finianz, Standard Bank and West Merchant Capital Markets.

# Methodology: economic projections

Euromoney received replies from 32 economists at leading financial and economic institutions they gave each country economic performance for 1997 and 1998 a score out of 100 after making comparisons between countries and years. The world's fastest growing, best-performing economy in an ideal year would score 100; the worst economy in a disastrous year would score zero. Respondents were asked to consider sustained economic growth, monetary stability, current-account/budget deficit or surplus unemployment and structural imbalances. Economist also gave their forecast for real GNP growth for calendar years 1997 and 1998. They scores in ranking are the average of those forecasts

The ranking represents an average of economic performance scores for 1997 and 1998. Countries, which received one or no votes, were excluded.

Here the Exporting Countries and the Potential Countries mentioned by these 9 companies are ranked (Country risk Rating)<sup>13</sup> according to the *Euromoney* Company.

Rank	Countries	Euromoney
March 1997		Rating
82	Pakistan	b
118	Myanmar	ccc
79	Sri Lanka	b
99	Nepal	ccc
54	Philippine	bbb
49	Mauritius	a
27	Hong Kong	aa
73	Vietnam	bb
91	Russia	b
137	Ukraine	cc
14	France	aaa
96	Kenya	b
3	Singapore	aaa
130	Yemen	ccc
116	Cambodia	cc
144	Nigeria	ccc

Here in the chart: a stands for  $(\alpha)$ , b stands for  $(\beta)$  and c stands for  $(\chi)$ 

Analysis Result: From the study we can see that the countries were Aventis has its export operation are in average rating.

<sup>&</sup>lt;sup>13</sup> Country risk Rating (*Euromoney*)- Appendix-L

INCHI RUDUII

AVEILLIS

**Myanmar:** having a poor rating that is 'ccc' and a rank of 188 serial. So this country is a bit risky to deal with. Even though as for a continuity concern of business its risk are not that significant. But for non LC export this country is not to be relied as their credit rating and access to bank finance is 0.00 and potential risk is 7.63.

**Sri Lanka:** Having an average rate of 'b' and a rank of 79. They can be relied though their credit rating access to bank finance is not positive.

**Philippine:** Having good enough rating of 'bbb' and a rank of 54. Their economic performance is 16.53 were as credit rating is 3.33 and access to bank finance is 1.50.

**Mauritius:** Having good rating of 'a' and a rank of 49. Their economic performance is 23.55 were as credit rating is 4.67 and access to bank finance is 1.12.

**Hong Kong:** Having very good rating of 'aa' and a rank of 27. Their economic performance is 20.38 were as credit rating is 6.89 and access to bank finance is 5.00.

The potential countries for the future operation of Aventis are Nepal and France their evaluations are:

**Nepal:** having a poor rating that is 'ccc' and a rank of 99 serial. Their economic performance is 4.61, political risk is 7.26, debt indicator 9.04, debt in default or reschedule is 10.00, were as credit rating is 0.00, access to bank finance is 0.00, access to short term finance is 3.17, access to capital market is 0.00, and discount on forfating is 2.18. So this country is a bit risky to deal with only LC export can be a less risky transaction.

France: having an excellent rating that is 'aaa' and a rank of 3 in serial. Their economic performance is 19.42, political risk is 23.53, debt indicator 10.00, debt in default or reschedule is 10.00, were as credit rating is 10.00, access to bank finance is 5.00, access to short term finance is 5.00, access to capital market is 5.00, and discount on forfating is 5.00. So this country is a almost risk less and very potential to deal with. There is a big expectation from this Country. This will give Aventis Pharma a competitive edge over the others.

**Limitation of the Study:** As these are secondary data it was less difficult to work with these data are collected forma a handbook of Country and political risk analysis and Internet. The main limitation was the current data were not found. Therefore I had to work with old data which hopefully will give an over all insight in to the country risk.

# AVEITUS

#### **SWOT Analysis**

#### **Strengths:**

- ❖ Be Under the Umbrella of a Leading Brand: Aventis Pharma is a subsidiary of the world Leader brand name AVENTIS. This increases the rating of the company. This shows the financial solvency, credibility, reliability, and quality. This opportunity will add more values to the company to operate in more extended environment that they could never achieve as Rhone Poulenc Rorer, Fisons or Hoechst.
- ❖ Asset of the company: The Managing Director is the main asset of the Aventis Pharma of Bangladesh. He is a man of excellence and dignity. He is a highly qualified man who is successfully motivating and managing the subordinates.
- ❖ The directors of the Company: The divisional heads are the directors. They are the chosen qualified most personnel having foreign degrees.
- ❖ Multinational Company: Aventis Pharma Bangladesh is a subsidiary of the France based Company. It is a global leader and a Global Brand.
- ❖ Huge Resources: Aventis Pharma Bangladesh as a part of the large Multinational will obviously enjoy the huge resources. They are therefore can go for costly venture. Spend more to get better profit.
- ❖ Excellent Principle: Aventis Pharma Bangladesh has a set of excellent principle, by which the company is abide by. The principles are highly ethical and have moral thoughts.
- ❖ Aventis Values: Aventis values are the utmost satisfaction for the customers first. "Aventis challenge is Life" every where they mention this as they firmly believe this.
- ❖ Mission: The mission of the company is very challenging and is in the on going process of achieving through its non-compromising vision.
- **Excellent Organizational Hierarchy:** The organogram of Aventis Pharma is Horizontal, which means less bureaucratic criticality. Therefore making decision and implementing those on time is possible.
- ❖ **High Quality:** Aventis Pharma maintains a very standard Quality of production, which is maintained as per the corporate requirement. They follow the GMP. The externals of corporate visit and monitor the plant so that quality is not decreasing.
- ❖ **Highly Value the Employee:** Aventis Pharma highly values the employee engaged to assure they are not having any inconvenience such satisfaction are increases the efficiency in turn productivity.

- - **Export Trophy:** Aventis Pharma was awarded Export Trophy for the best exporter in Pharmaceutical Companies in Bangladesh in the year 1999. This shows that Aventis is efficient enough to become the market leader.
  - ❖ Having Less Risky Export Ventures: Other then Myanmar the rest of the exporting countries are less risky to transact with. Even with Myanmar it is a long business relation which is also a positive indicator of lower risk.
  - ❖ Overseas Marketing Operation: Aventis Pharma is having overseas marketing operation to Myanmar very few companies are able to do that. This is the competitive age that Aventis over the others.
  - Product Registration: Aventis already registered more then 50 products in the foreign market and in the process of further expansion.
  - ❖ Competitiveness: Aventis Export unit is very efficient and competitive they considers all other to be their competitors that's way this project work is done to find out the real position of the firm and how to improve more.
  - ❖ High Potential Countries: Aventis already started working with potential countries for further expansion. In the process SIDAPHARMA a France based company was found. This is a highly potential country to export. This is because their Country Risk Rating (Euromoney) is very good. And certainly this is a competitive age over the others, as this deal was only be able to settled to be a subsidiary of the multinational through which the offer came
  - ❖ Payment Method: Aventis does both LC and non-LC transaction. The non-LC transaction helps Aventis to save the commission that were to pay the bank for LC business.

#### Weaknesses:

- ❖ Small Unit run by a Single Individual: Aventis is having a small business unit run by a single individual were as Square, Beximco, Novertis, Acme, Jayson, ACl all are having organized department run by at more then one personnel.
- ❖ Unfortunate Frequent Change in the Management: The unfortunate frequent change of the Export Manager can be considered to be a weakness of the Export Unit. This instability caused business loss, customer loss, and loss of previous data and information. This is why the Export Unit is not in the market position where it was suppose to be. Though it was not the fault of any one but it was problem for the company.
- ❖ Late Start: When Beximco, square, Novertis companies like this started their operation in early 90s. Aventis started in 1995-1996. This means this unit is still an infant in the Pharmaceutical Export Industry. The pioneer will obviously enjoy the competitive age over the others.
- Few Exporting Countries; Now Aventis is exporting mainly in three countries Myanmar, Sri Lanka, Hong Kong. Philippine and Mauritius are some how discontinued. This year only one transaction was done with Philippine and non-transaction with Mauritius. Were as Square, Beximco, Novertis are dealing at least 7 countries.
- ❖ Ignoring the potential Countries: From the study it was very clear that the best exporting country is Pakistan. 17.75 of the total Pharmaceutical Export is done to Pakistan. All Square, Beximco, Acme, ACI has their export operation in Pakistan. But eventually Aventis ignored Pakistan.
- ❖ Lower Transaction Unit: Aventis is having random transaction with Myanmar but the unit of the transactions is very low. This in turns increasing the expenses of the export Unit.
- ❖ Poor Export Revenue: In competitive market when Square, Beximco is earning Export revenue of taka 6-10 crore, Aventis is only earning direct Export revenue of taka 1-5 crore only.
  - ❖ Future Export Plan: Almost all the companies having vast planning and preparation for future Export. Novertis targeted 60 more countries to start operation, Beximco, Square, Opsonin, Acme, all targeted at lest 5 countries to start new venture were as Aventis only considering two new countries for further operation.
- Shipment Mode: Aventis is doing business by air only, this is very costly. Almost 10% of the total consignment value is provided as freight charge. Others are dealing though Air, Sea and road also. The bottle products can be shipped through sea.

# **Opportunities:**

- ❖ Growing Market: The pharmaceutical business is a growing market and very potential as the life expectancy of the people is increasing. Government of all the countries, International institutions like WHO World health organizations, UNICEF, NGO's started working with decreasing death rate by increasing people's health.
- ❖ Expansion of Export: As being the Aventis now the company is concentrating the Export and trying to put new Products to new countries. Some Asian countries like Nepal, Bhutan, Philippine, Mauritius, few African countries, some Russian Countries are largely dependent on medicine imports.
- ❖ Nepal Export Fair: Nepal organized an export fair where the Export unit of Aventis is going to take part. This probably would bring new opportunities for Aventis in further expiation of the international market.
- ❖ New Venture with SIDAPHARMA: SIDAPHARMA a France based company showed their interest to import from Aventis. This would be great opportunity for Aventis, provided they would be importing in large amount.
- ❖ New offer of Saudi Arabia: Recently Aventis received a written notice from EPB. EPB mentioned Saudi Arabia is interested to import various items including medicine from Bangladesh as for the preparation of Holly Hazz. This is a great opportunity as the volume is expected to be very high and there is a chance to build up a relation for continuity concern.
- ❖ New Interest of Yemen: Recently Yemen Corresponded with EPB and showed their interest to Import medicine from Bangladesh this will also explore the opportunity of the export of Aventis Pharma.
- ❖ Interest of USA: USA the highest importer showed their interest to import a large consignment from Bangladesh. If business with USA is confirmed then there is a great opportunity to earn handsome export revenue.
- ❖ Supports of EPB: Export Promotion Bureau of Bangladesh is very much concern of the export of promotion of Pharmaceutical products. They are working hard on the matter and keeping in touch with the Pharmaceutical companies.

# Threats:

- ❖ Strong Competitors: The competitor of Aventis is India who is in the competition with their lower priced products. Whereas Aventis is striving with their high quality product.
- \* Registration Complexity: The registration criticality is a great threat to Aventis. This is a very time consuming procedure and lot of other formalities is involved here. For this sometimes LCs' are amended again and again with new extended dates. This may cause break in the normal flow of business. And customers may become dissatisfied.
- ❖ Narcotic Product: The exports of narcotic products are even critical. Every time they are exported they should be taken permission from the narcotic department. It is also found the narcotic orders are the highest in volume and amount.
- ❖ Discontinued Products: Sometimes the customers are ordering the discontinued products or the products that are planned to discontinue. In such situation it is hard to bounce back the order because some orders only the discontinued products which as a continuity of the regular transaction of the past years.
- ❖ Air Freight: Aventis only transact through air and this is very costly. Recently they are imposing the war charge along with the airfreight. This will obviously increase the freight expenses in some certain extent.
- ❖ Global Brand: Aventis has a mission to globalize the product brand. This is a big threat because if this is implemented then the price of the products will become significantly higher and out of the range of the Developing countries, (third world countries). Certainly then the export business will fall and loss all the markets that are price sensitive.

# AVEILLIS

# Alternatives:

Based upon the Data analysis (Primary & Secondary), Country Risk Analysis, and SWOT Analysis. The following Alternatives can be placed for suitability analysis.

- 1. Do Nothing.
- 2. Expand The International Market Through Registering in New Countries
- 3. Expand The International Marketing Through Registering New Products and Recruiting Medical representatives in the existing market.
- 4. Expand The International Market and Marketing Through Registering to Operate in New Countries, Recruiting Medical representatives and Registering New Products for Both New Countries and for the Existing.
- 5. Discontinue the Narcotics Products.

Whatever steps are taken each of them has some advantages and disadvantages. A careful analysis will guide the company towards the most effective solution of the company's problem. So each of the strategies are further analyzed based upon the advantages and disadvantages they offer to Aventis Pharma. The best alternative will be that one, which offer maximum benefit and minimum costs for Aventis Pharma.

**Imovane** 

24 h ours in harmon.

#### Alternative # 1: Do Nothing

One of the earliest alternatives Aventis Pharma has in front is to do nothing. Here Aventis Pharma can take no action and steps and let thing run the way it is. Weather it is the right or not depends upon the further analysis, comparing with the prose and corns with the other alternatives. And see which one is more feasible.

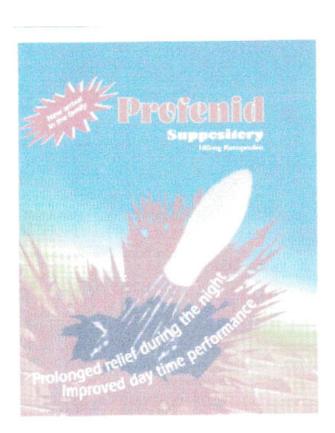

#### Advantages:

- No additional cost is involved: if things goes on as it is then Aventis Pharma will be able to save additional expenses. To go for the other strategies there are some cost involved. By taking no action Aventis Pharma can save a significant amount and invest it to some other potential department.
- ❖ No Time and effort is required: implementation of new strategies and take new steps requires a lot of time. Aventis Pharma's major functional units will be involved, individuals working in this unit will be occupied for information collection, organize and interpret information, findings feasibility studies all this will require huge time, which can be utilized to improve some improvement of other Potential departments.
  - ❖ No change is required: New strategy calls for change. Whatever change is made, whatever improvement is made nothing goes extensively with the existing system.
- ❖ No training arrangement is required: Training is required by most of the companies to convert the strategic objectives into reality. This needs time, effort, money which company can save by choosing alternative #1.
- ❖ No need to hire additional human resource: If nothing is done then there won't be any need for additional management to convert the new strategy. This will require more salary and other benefits. This cost can be avoided by taking the alternative #1 do nothing.
- ❖ No Need to visit the foreign country: If nothing is done then there will be no need to visit the foreign country to make necessary arrangements for the new international business.

#### Disadvantages:

❖ Export unit may become loss-making sector in future years: If no steps are taken in such a growing industry. The Export Unit may lose its efficiency and become a loss-making sector. From the primary data we can see that Aventis Pharma export unit is becoming incompetitive as the other companies are not static.

- AVEILLIS
- ❖ Strong probability to decrease in Export revenue: Revenue is the bread for the company. Based upon the revenue, it operates. If no further steps are taken to boost up the export unit there is a chance in decreasing the revenue.
- ❖ Decrease in market share due to other active companies: As the rivals are not sitting idle they may capture the market of Aventis Pharma. Now a lot of other companies are offering product to the same market of Aventis Pharma, If no steps are taken Aventis Pharma will remain were they are now mean while the other companies would be able to capture a larger portion of the market.
- ❖ Threat of substitute product from the rival: Now Aventis Pharma is not having any pressure of rivalry from the domestic firm, as they are not offering the same product in the same market. If Aventis Pharma do nothing then in future then other domestic companies may outperform Aventis Pharma by snatching some of its market.

# Alternative # 2: Expand The International Market Through Registering in New Countries.

Weather it is the right strategy or not depends upon the further analysis of this alternative, comparing with the prose and corns with the other alternatives. And see which one is more feasible.

#### Advantages:

- \* Export unit may resist from become loss-making sector in future years: If alternative #2 is taken, then in such a growing industry it will be easy to expand by registering new countries. From the primary and secondary data it is found that Aventis is trying to go for potential countries in smaller aspect when the others are in speedy growth. If Aventis start expanding in greater extent then only they may overcome the fear of making loss in future years.
  - ❖ Increase Export revenue: Revenue is the bread for the company as said earlier. If Aventis choose the 2<sup>nd</sup>. Alternative then there is a great chance to increase export revenue.
  - ❖ Increase market share: Aventis Pharma choose the alternative 2 then they will be able to increase market share. And will be able to outperform the domestic companies even the rival India.
- \* Minimize the threat of substitute product from the rival: Now Aventis Pharma is not having any pressure of rivalry from the domestic firm, as they are not offering the same product to the same market. If Aventis Pharma starts expanding market then they will certainly enjoy competitive edge over the others. The future threat of substitute product from the rivals will be minimized. This is because they will be having operation in many countries if they are defeated in one country they may be able to explore in another country.

#### Disadvantages:

- ❖ Additional cost is required: Implementation of a new strategy will obviously involve additional cost. To get registered to export in a country requires a significant fee to be paid to the newly registered country embassy.
- ❖ Additional Time and effort is required: To be register to a country to export it goes through a time consuming procedure. Much labor and effort is required to do documentary work.
- ❖ Need to hire additional human resource: If this alternative is chosen then there will be require to engage new people to take these extra loads. This will increase the cost of the company.
- Foreign country visit will be required: To implement this strategy will require foreign visit to at the beginning. This is a expense of the company.

Alternative #3: Expand The International Marketing Through Registering New Products and Recruiting Medical representatives to the Existing countries.

The third alternative is whether a right strategy or not depends upon the further analysis of this alternative, comparing with the prose and corns with the other alternatives. And see which one is more feasible

#### Advantages:

- ❖ Export unit may resist from become loss-making sector in future years: If alternative #3 is taken, then in such a growing industry it will be easier to expand international marketing by registering new products and recruit new medical representatives. From the primary and secondary data it is found that Beximco, square, and Jayson is already in the overseas marketing. Aventis is also in Myanmar. If they can expand this by recruiting more in the existing countries as required then the potentiality is very high same for the new product registration in the existing countries
  - ❖ Increase Export revenue: To increase the Export revenue this is the better alternative, as the revenue increases depending on the marketing strengths and product Varity.
  - ❖ Increase market share: If Aventis Pharma choose the alternative 3 then they will be able to increase market share. Because effective marketing execrate the market share.
  - ❖ Minimize the threat of substitute product from the rival: If Aventis Pharma has large Varity of product then there will be few chances to be threatened by the substitute product, specially when the sales force are working physically with it.
  - **Can dominate Market:** If Aventis recruit sales force and register new product they will be able to outperform the rivals easily.

# Disadvantages:

- ❖ Additional cost is required: Implementation of a new strategy will obviously involve additional cost. To register new product and recruit more sales force a lot of cost will be increased.
- ❖ Additional Time and effort is required: To be register new product from Drug Administration and recruit sales force is a lengthy time consuming procedure. Much labor and effort is required.
- ❖ Need to hire additional human resource: If this alternative is chosen then there will be needed new management to take these extra loads. This will increase the cost of the company.

- Foreign country visit will be required: If this strategy is implemented then it will require a foreign visit to recruit the sales force.
- ❖ Monitoring will be required: If the new product registration is in the procedure then it requires repetitive follow-up. And for the sales force performance monitoring will be required.

Alternative #4: Expand The International Market and Marketing Through Registering to Operate in New Countries, Recruiting Medical representatives and Registering New Products for Both New Countries and for the Existing.

The fourth alternative is whether a right strategy or not depends upon the further analysis of this alternative, comparing with the prose and corns with the other alternatives. And see which one is more feasible.

## Advantages:

- ❖ Export will become worthy in future years: If alternative #4 is taken, then in Aventis will be able grow fast, effectively competitively outperforming the rivals. Expanding the new market expansion of the marketing by registering new products and recruit new medical representatives for both new countries and the existing one will eventually boost up the export. Aventis is now in Myanmar if they can recruit the sales force in the new countries from the very beginning and for the potential existing countries the export are to be greater.
  - ❖ Increase Export revenue: To increase the Export revenue this is the best alternative, as the revenue increases depending on the marketing strengths product Varity, as well as the attending new markets will increase the revenue for large extant than now.
  - ❖ Increase market share: If Aventis Pharma choose the alternative 4 then they will be able to increase market share. When the best possible steps. If (alternative #4) is adopted then it is certain to be successful to capture the larger share of the market.
  - ❖ Capture even the rivals market: If Aventis Pharma have large Varity of product both in new and existing market and sales force working for the promotion physically in both new and old potential countries then they will capture the market of others.
  - ❖ Can be a dominating market leader: If Aventis recruit sales force and register new product they will be able to outperform the rivals easily and in turn will become the market leader.
  - ❖ Capital will not be tiedup: if Aventis Pharma take this strategy the investment will come up very shortly and the capital will not be tied up.

#### Disadvantages:

❖ Additional cost is required: Implementation of a new strategy will obviously involve additional cost. To register new product to recruit more sales forces and go for new markets a lot of cost will incur.

- ❖ Additional Time and effort is required: To be register new product from Drug Administration and recruit sales force and to be in the new international market is a lengthy time consuming procedure. Much labor and effort is required.
- ❖ Need to hire additional human resource: If this alternative is chosen then there will be needed to engage new people to take these extra loads. Recruitment of new sales force will increase the cost of the company.
  - ❖ Foreign country visit will be required: If this strategy is implemented then it will require a foreign visit to recruit the sales force.
  - ❖ Monitoring will be required: If the new product registration is in the procedure then it requires repetitive follow-up. And for the sales force performance monitoring will be required.

#### Alternative #5: Discontinue The Narcotics Products.

The fifth alternative is whether a right strategy or not depends upon the further analysis of this alternative, comparing with the prose and corns with the other alternatives. And see which one is more feasible.

#### Advantages:

- ❖ No additional cost is involved: If narcotic products are discontinued then Aventis Pharma will be able to have smooth operation. As this requires permission for every consignment.
- ❖ No Time and effort is required: implementation of these strategies and take new steps will save time. Aventis Pharma's major functional units will be involved, individuals working in this unit will be occupied these activities can be reduced.
  - No change is required: To implement this strategy will not take any changes.
  - ❖ No LC Amendment is Required: If narcotic products are discontinued then there will not be any requirement for LC date rescheduling.

#### Disadvantages:

# Figat

- **Export unit may get loss:** If narcotic products are discontinued then a significant amount of Export may be lost. As it is found as a great sold products.
- ❖ Strong probability to decrease in Export revenue: If a significant amount of Export is lost the revenue will eventually decrease.
- ❖ Loss of valued customer: by implementing this alternative there is fear of loosing valued customer who import mainly the narcotic products.
- ❖ Threat of substitute product from the rival: If the customer goes to others for one product then they may start to import other substitute product from the new party for convenience.

# Part - 3 RECOMMENDATION

#### Recommendation

Aventis Pharma is suppose to select and implement the alternative which will help the company to boost up its export and get the competitive edge over the others. By analyzing and comparing with the prose and corns of these five alternatives mentioned as earlier. I would like to recommend Alternative #4: Expand The International Market and Marketing Through Registering to Operate in New Countries, Recruiting Medical representatives and Registering New Products for Both New Countries and for the Existing. The justifications of my recommendation are:

Alternative #1 Do Nothing, offers several benefits. By doing nothing cost, effort and time can be saved. Additional recruitment, training arrangement, foreign visit can be avoided. But

Efficiency will keep on decreasing. And there is a threat of thrown out of the market.

Alternative # 2: Expand The International Market Through Registering in New Countries. Which is not very worthy enough to get the lead of the market the advantages mentioned in the section are fewer then the chosen alternative, which includes these advantages also.

Alternative #3: Expand The International Marketing Through Registering New Products and Recruiting Medical representatives. This alternative is much better then alternative #2. This fills up the lacks of the previous alternatives.

Alternative #5: Discontinue The Narcotics Products. This alternative will not solve the purpose of the study. This is to consider in the process of Export even though it is found not to be supportable.

The recommended alternative is:

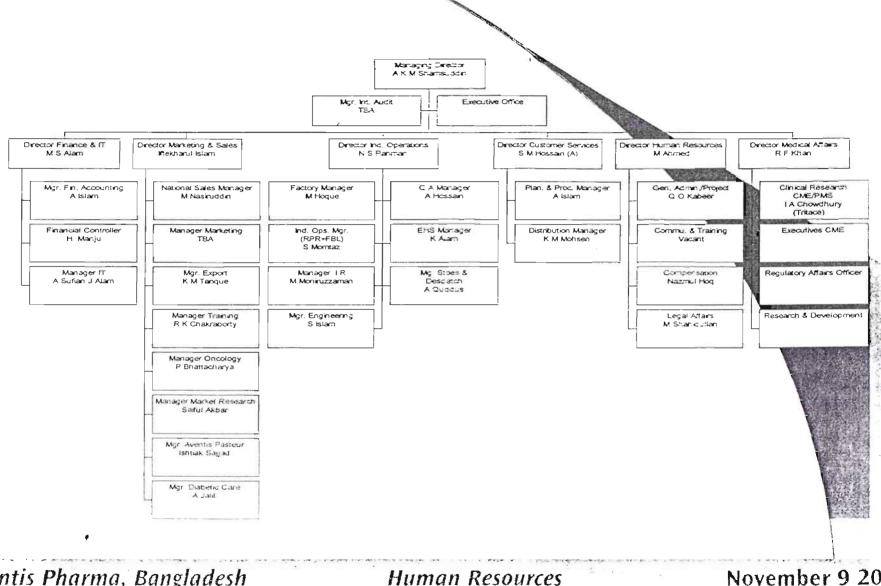

Alternative #4: Expand The International Market and Marketing Through Registering to Operate in New Countries, Recruiting Medical representatives and Registering New Products for Both New Countries and for the Existing. This alternative includes huge cost associated with it but the investments will retrieve in a short time if the implementation is efficiently done. It is certain that alternative #4 offers more benefits compared to disadvantages. This Alternative solves the purpose of the study to be initiated that is to expand the export of Aventis Pharma. For achieving this first to measure:

- Where are they standing today?
- Where are they intending to go?
- How do they get there?

To know that this project is initiated: "Competitive analysis of the Pharmaceutical companies of Bangladesh, involved in export".

SPL/EXP/269/2001 June 14, 2001

Mr. A K M-Nizamul Alam Director (Com. 1) Export Promotion Bureau 122-124, Motijheel C/A Dhaka – 1000

Fax # 9568000 Total 03 pages

Dear Sir

This refers to the meeting of Bangladesh Pharmaceutical Manufacturers at EBP on 11<sup>th</sup> June, regarding the prospect of exporting our pharmaceutical products to the Philippines.

We had discussed about the price structure of the Indian products currently marketed in the Philippines.

We came to a decision in that meeting that EPB would request the Honorable High Commissioner of Bangladesh at the Philippines to purchase the available Indian products and would send those to EPB.

In this context, we would like to mention the following, the information on which would help us evaluate the price structure of Pharmaceutical products.

- 1. Import duty structure and the import duty represents what percentage of the CIF value of the product.
- 2. Does the import duty is fixed for all product categories or it varies according to the product group?
- 3. Any other Government duties that are applicable for pharmaceutical products. For example, in Bangladesh we have 15% VAT on the products Trade price (TP).
- 4. Government (or Ministry of Health) approved Retailer's commission, which is added by the retailers (Chemist shops, Drug stores, etc.) in the final product price. For example, in Bangladesh, the approved rate is 16% on the Trade price.

To elaborate this, we would like to site an example for any products imported to Bangladesh and for products manufactured in Bangladesh.

Mil L

# SQUARE

## For products locally manufactured:

the trade price (TP) of a product is Tk. 100.00 (one hundred) only, this Tk. 100.00 comes to the company's account. The company pays 15% VAT on the TP at the source of the product and adds this to the product price, while selling to the retailers or wholesalers. So, the buying price of the chemist shops/retailers is Tk. 115.00.

The chemists have an approved profit margin of 16% on the TP, which he adds to the buying price to sell to the patients. So, the final selling price comes to Tk. 131.00.

TP = Tk. 100.00 VAT = 15% on TP = Tk. 15.00 Buying price of the chemist = Tk. 115.00 Chemists' profit margin = 16% on TP = Tk. 16.00

Final price to the patient or consumer = Tk. 131.00

So, the manufacturer pays the VAT initially at the source. Then they collect the money from the chemists while selling to the chemists. The chemists in turn collects back the VAT from the consumer, while the consumer buys the product. Ultimately, the consumers pay the VAT.

We believe that the arrangement for the above information from the High Commission of Bangladesh in the Philippines would enable us to calculate our products final prices to the patients of the Philippines and we may formulate the pricing policy to make our products competitive at the Philippines market.

Looking forward to your kind cooperation in developing successful business contacts for exporting our products in the Philippines.

Please note that along a hard copy of this letter, I will also share a copy of a publication in SCRIP, a world-renowned journal on Pharmaceutical Market Information, to be delivered to you by hand.

Best regards.

Sincerely

Md. Mizanur Rahman

Manager, International Sales International Marketing Department

Subject: Supply of information on pharmaceutical products.

Dear Sir.

In reference to your FAX No. EPB/ODD/SEC-II/3(5)/94/861 dated 03.06.2001, the information for promotion of export of pharmaceutical products are as below:

Yes, the labelling of our pharmaceutical products are at per with India.

2. No, the prices of our pharmaceutical products are not higher than the Indian pharmaceutical products.

3. Yes, our companies could print the Generic name more prominently than F and name on the packets of the medicines.

4. Yes, quality of our packing could be improved from the present standard.

This is to inform you that amongst the mentioned drug we have only the following drugs in production.

L. Co-trimoxazole (Tab. Politrim DS) 800 mg SMZ + 160 mg TAP tablet.

2. Glibenclamide (Tab. Gluconil) 5 mg tablet.

5. N'Iredepin pmg

We also produce the following drugs but in different strength (Nifedipine 10 mg and Glibenclamide 5 mg).

Information regarding your queries on the FOB & C&F Prices of our products, we are sending you FOB Price and working on the C & F Price which will soon inform you separately.

We are pleased to send the samples to you for your consideration and recommendation to the Department of Health in Manila.

government has decided to go ahead with a essential generic products from India, in an e down the cost of basic medicines.

Secretary Manuel Roxas said that around shed drugs would be brought in initially, for ent-run hospitals in the Metro Manila area. He hat the government was looking at importing so for local formulation to help bring down continuing concerns about generic quality, he imports would be tested to ensure local standards. Names of specific Indian released, and the government is still act volume requirements.

trade, while the Department of Health will control trade, while the Department of Health will and distribution. The Philippine International Import the products once it receives formal the Bureau of Food and Drugs.

seeking better medicines access for the dy the Chamber of Filipino Drug
The group is pushing for imports to be steriels, on the basis that smaller to be able to compete with state-supported products, although they may offer ced raw materials. It also argued that the see only a limited impact on multinationals, portrayed as the main culprits behind cal prices. The chamber's 48 member around 30% of the market.

Legislative changes are in hand to formally recognise and certify parallel traders and to allow parallel drug imports, which under the 1997 Counterfeit Drugs Law have been considered unregistered and illegal counterfeits.

Around 80% of pharmaceuticals sold in the Philippines are locally formulated, and toll manufacturing costs are now coming under scrutiny in the heated domestic debate about drug pricing. The Manila Bulletin reports that the DTI is conducting a comparative study of such costs to determine whether these are significantly higher than elsewhere in Asia. Interphil Laboratories is a major player in the local contract manufacturing sector.

### ... improve competition/quality

The effect of the dominant market position of some companies in the pharmaceutical sector has also been highlighted in a study on the likely effect of increased competition on drug prices.

The study, by the University of the Philippines, noted that around 80% of companies distribute products through Zuellig Pharma, while Mercury Drug holds around 60% of the retail market. Parallel imports may well find it hard to penetrate these sectors and thus have their price advantages eroded, the Manila Bulletin reports the study as saying. One suggested way to control costs more tightly would be for the government to use its own network of medical facilities to carry out distribution activities.

Meanwhile, the Pharmaceutical and Healthcare Association of the Philippines (PHAP), which represents research-based multinationals, has again called for improved generic quality. Government, industry and doctors should work together to ensure high generic standards and overcome negative perceptions, while counterfeit and unregistered parallel imports should be strictly controlled, PHAP president Ed Feist suggested.

### .. world news in brief

TCMs take larger share of Chinese oral antidiabetics:
The share of the Chinese oral antidiabetic market held by traditional Chinese medicines (TCMs) increased from 17% in 1995 to 26.3% in 1998, according to a survey of major cities by the South Medical Economic Research Institute. Western synthetic drugs accounted for the remainder, led by glibenclamide with a share of 24.2%, down from 54.5% in 1995. The leading TCM product in the category in 1998 was Guangzhou Traditional Medicine Factory's Xiao Ke Wan, with a 15.7% share, Pro Re Nata's PRN Profile quotes the survey as showing.

m WIPO to simplify global patent system:

The World Intellectual Property Organisation (WiPO) is working on a new patent law treaty aimed at cutting the cost and complications of patent protection and making the system more user-friendly. Member countries agreed most of the treaty's provisions last year and it is expected to be adopted during the next three weeks, the UK Financial Times newspaper reports. It will come into effect after ten WIPO members ratify it. The new treaty will allow applicants to make an initial filing without using a patent agent and to file applications in any language, even if a translation is required later. WIPO members are expected to discuss more substantive issues later this year, including reconciling the US's "first-to-invent" system of patent priority and the "first-to-file" approach used in the rest of the world.

urce: Export Division of Drug Administration.

- (ii) arrangement has been made for receipt of title to goods like Bill of Lading, Airway Bill etc. by the AD on shipment of the underlying goods,
- (iii) The EXP Form is signed either by the exporter or one holding valid, legal power of attorney from the exporter and the terms of the power of attorney are such that both the exporter and the attorney may be held responsible jointly and severally for repatriation of export proceeds.
- (iv) Bonafides of the buyers/consignees abroad and their credentials etc. Where necessary, ADs should make discreet enquiries in this regard through their correspondents abroad etc., greater care should be taken particularly in cases of shipments against Trust Receipts and shipments on CAD or DA basis. Where ADs doubt the bonafides and standing of the buyers/consignees abroad or where owing to common interest or otherwise they suspect collusion with the intent of delaying or avoiding repatriation of export proceeds ADs should report such cases promptly to Bangladesh Bank. Similarly, ADs should report to Bangladesh Bank cases where it comes to their knowledge that the exporters are directly or indirectly connected with or have any financial or other interest in the buyer/ consignee abroad. Where felt necessary, discreet enquiry about the bonafides and credentials of the charter party should also be made in case the shipment is to be against a charter party Bill of Lading so as to avoid loss of cargo /foreign exchange.
- (c) For delay in repatriation or non-realisation of export proceeds, the exporter as well as the AD and its officials certifying the export forms render themselves liable to punitive action under the FER Act. Therefore, in their own interest both exporters and the ADs should be alert and active in ensuring timely repatriation of export proceeds.
- 8. In exercise of the powers vested in the Bangladesh Bank under Section 20(3) of the FER Act, all carriers whether common or private (Railway, Shipping or Airline companies) and their agents are directed as under:
  - (i) That in respect of export of goods from Bangladesh (excepting export from Type A industrial units located in the EPZs) to foreign countries by land route or by sea, the Railway Receipts, Bills of Lading and any other documents of title to cargo should be drawn only to the order of an AD designated for this purpose by the respective exporters and delivered to the authorized representatives of the ADs concerned and to none else. However, in case of export of goods, full payment for which value has been received by the exporter in advance through the AD, the Bill of Lading and other documents may be endorsed by the AD in favour of foreign importers and the same may be sent directly to the

Making out and delivery of shipping documents

importers abroad by the AD. There may be cases where goods shipped from Bangladesh to the neighboring countries by land route or even by cargo vessels reach the beneficiary earlier than the relative Bill of Lading, Truck receipts etc. This causes inconveniences and involves payment of demurrage at the port of destination due to delay in receipt of shipping documents. To overcome this problem, Shipping Companies may, at the request of the negotiating bank in Bangladesh, issue Telegraphic Delivery Orders on their agents in the relevant center directing them to deliver the goods to the order of the AD bank's correspondents in the buyers' country. A copy of the telegram /telex message, duly authenticated by the Shipping Company /Agent, should be passed on to the relevant AD who would send his own tested cable /telex instructions to his overseas correspondent asking the latter to hand over the Delivery Order to the consignee and stating the amount to be realized from the consignee before the Delivery Order is released. The usual shipping documents namely, invoice, bill of lading etc. may be despatched to the correspondent bank as usual.

- (ii) In respect of export of goods from Bangladesh (excepting exports from Type A industrial units located in the EPZs) to foreign countries by air, the Airway bills and any other documents of title to cargo should be drawn to the order of a bank in the country of import nominated by the AD designated for this purpose by the respective exporters and delivered to the authorized representative of the AD. However, in case of export of goods, full payment for which has been received by the exporter in advance through the AD, the AD may allow the Carrier Company to draw the documents to its own (AD's) order and then endorse the documents including the Airway Bill in favour of the foreign importers. The same may be sent directly to the importers abroad by the AD. The above directions shall not apply to exports exempted from repatriation of export proceeds and listed in para 2 of this chapter. Export of fresh fish, vegetables, fruits, poultry and other goods of perishable nature is also exempt from this direction. The documents of title to cargo like Bill of Lading, Airway Bill in respect of goods shipped from the fully foreign-owned enterprises (Type A industries) in the EPZs may also be drawn in favour of the consignee /LC opening bank.
- 9. The ADs to whose order the relative Railway Receipts, Bills of Lading etc. are drawn shall endorse the same to the order of their foreign correspondents but in no case they shall make any blank endorsement or endorse it to the order of the consignee unless they have obtained specific or general approval of the Bangladesh Bank therefor. To: EPB, Dhaka

From: Bangladoot, Manila

No. : Export-1/2001 Date : 30 May 2001

FOR VICE CHAIRMAN FROM AMBASSADOR

FAX MESSA

REPEATED TO :DIRECTOR GENERAL (SEA), MOFA

Please refer to our earlier communications regarding marketing of our pharmaceutical products in the Philippines. Today, I have handed over the samples of our pharmaceutical products along with the literatures of three Bangladeshi companies namely, Square Pharmaceuticals, ACME laboratories and BEXIMCO Pharmaceuticals to the Secretary (Minister), Department of Health of the Philippines. The Department of Health will examine the quality and other technical aspects of our products and will report to the Department of Trade. The Secretary (Minister) of Trade with whom I met earlier, assured me that they will consider importing our pharmaceutical products provided the Ministry of Health approve our products. Secretary, Department of Health has pointed out the following:

- a. Whether our companies could print the Generic name more prominently than Brand name on the packet of the medicine.
- b. Whether quality of our packing could be improved from the present standard.
- c. Whether the price of our products are comparable to that of India.

We are very hopeful about marketing of our pharmaceutical products in Philippines for the first time. Currently the Philippines Government decided to import the following seven drugs. Gradually they will increase the number. At this stage they are facing pressure from the pharmaceutical companies and also from the politicians to reduce the high cost of medicine.

- a.Cotrimoxazole (Bactrim)800 mg SMZ+160 mg TMP tablet
- b.Co-Amoxiclav (Augmentin 375 mg tablet
- c. Co-Amoxiclav (Augmentin 625 mg tablet
- d. Glibenclamide (Daonil) 2.5 mg tablet
- e. Glibenclamide (Daonil) 5 mg tablet
- f. Nifedipine (Adalat Retard) 20 mg capsule
- g. Salbutamol (Ventolin/Ventolin) 100 mcg/doseX200 doses metered inhaler

I should be grateful, if you could kindly send us samples of the above mentioned pharmaceutical products with Generic & Brand name and the FOB and C&F Manila price urgently to enable me to handover the same to the Secretary (Minister), Department of Health for necessary examination.

Looking forward for your immediate response.

Lish Harmest regards

(Monammed Farooq)

H.E. Ambassador Embassy of Bangladesh Manila, Philippines.

Subject: Certificates of Analysis of the medicines of Square Pharmaceuticals Ltd.

Sir,

I am sending herewith a fax message received from Square Pharmaceuticals Ltd. in EPB yesterday. Samples of some manufacturers/exporters are being sent through the Fair Division of the Bureau which will soon reach you. It may be noted that all the manufacturers of Pharmaceutical products do not produce those 7 products whose list was sent to EPB.

In this connection a paper cutting on "Philippines looks to Indian imports" published on 19th May,2000 in the PJB Publications Ltd 2000 is alse faxed herewith with a request to send the names/list of the twenty medicines and their samples so that Bangladeshi manufacturers/exporters can try in this regard.

Regards,

Yours faithfully,

SPL/EXP/278/2001 June 20, 2001

Mr. A K M Nizamul Alam Director (Com. 1) Export Promotion Bureau. 22-124, Motijheel C/A Dhaka - 1000

Fax # 9568: 00 Total 02 pages

Dear Sir

This refers to the meeting of Bangladesh Pharmaceutical Manufacturers at EBP on 11th June, regarding the prospect of exporting our pharmaceutical products to the Philippines.

As per your instructions to send the samples of few of our products, we would like to inform you that we are sending samples of our following products. The respective Certificates of Analysis (COA) are also attached.

Product Name	Batch No	Quantity
Cotrim Tablet Cotrim DS Tablet	104085 105160	03 Boxes. (Myanmar Packs.) 02 Boxes. (Local Packs.)
Loracef 500 Capsule Loracef 250 Capsule	011046 007574	03 Boxes. (Local Packs) 03 Boxes. (Local Packs)
Cef-3 Suspension Moxaclav Tablet	105598 103430	03 Phials. (Sri-Lankan Packs) 03 Boxes. (Local Packs)

Ceftron 500 IV Inj. With water for Inj. 5ml	010254 009051	03 Boxes. (Russia Packs)
Ceftron 500 lM Inj. With Lidocaine Inj. 2 ml	009115 009050	03 Boxes. (Russia Packs)
	N-P L	Page 1 of 2

Froduct Name	Batch No	Quantity
§ 100 Inhaler	102065	03 Phials. ( Local Packs )
Capsule Capsule	009154 009139	03 Boxes (Ukraine Packs) 03 Boxes (Ukraine Packs)
∃. Caps. Zhoeko sp.	010089 106156	03 Boxes (Russia Packs) 03 Phials (Russia Packs)
Dibenol 5 Tablet	104491	03 Boxes ( Sri-Lanka Packs )
Ceftron 150 Inj. With Lidocaine inj. 2ml	009114 009050	03 Boxes (Russia Packs)
Ceftron 250 IV Inj. VVith vvater for Inj.	009113 009051	03 Boxes (Russia Packs)

We like to mention here that we tried to provide sair. It is of our export packs, which are currently being marketed by our agents in different countries. The texts of corresponding countries are also incorporated in these packaging materials. This gives an idea that we can customize the text of packaging materials as per the regulations of the respective country and according to buyer's need.

We look forward to start a successful business tie-up with potential buyer (s) in the Philippines to start marketing of our products to add revenue to our National Export Earnings.

Please acknowledge the receipt of the samples and the COA of the products.

Best regards.

Sincerely

Md! Mizanur Rahman

Manager, International Sales

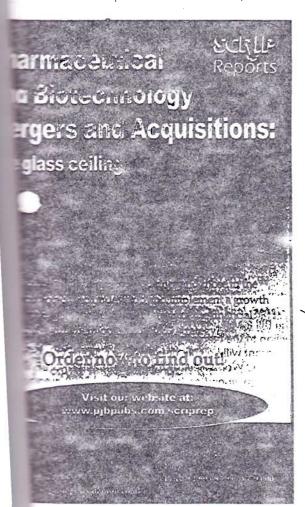

International Marketing Department

pane government has decided to go ahead with a property of the control of the drive down the cost of basic medicines.

Industry Secretary Manuel Roxas said that around can't finished drugs would be brought in initially, for comment-run hospitals in the Metro Manila area. He med that the government was looking at importing materials for local formulation to help bring down doesn'ng continuing concerns about generic quality, and that the imports would be tested to ensure that the imports would be tested to ensure that local standards. Names of specific Indian were not released, and the government is still its exact volume requirements.

plan, the Department of Trade and Industry will cobe overall trade, while the Department of Health will sesting and distribution. The Philippine International corp will import the products once it receives formal from the Bureau of Food and Drugs.

was generally welcomed by consumer groups,
been seeking better medicines access for the
cpposed by the Chamber of Filipino Drug
arers. The group is pushing for imports to be
aw materials, on the basis that smaller
will not be able to compete with state-supported
inished products, although they may offer
ely priced raw materials. It also argued that the
culd have only a limited impact on multinationals,
been portrayed as the main culprits behind
high local prices. The chamber's 48 member
hold around 30% of the market.

Legislative changes are in hand to formally recognise and certify parallel traders and to allow parallel drug imports, which under the 1997 Counterfeit Drugs Law have been considered unregistered and illegal counterfeits.

Around 80% of pharmaceuticals sold in the Philippines are locally formulated, and toll manufacturing costs are now coming under scrutiny in the heated domestic debate about drug pricing. The Manila Bulletin reports that the DTI is conducting a comparative study of such costs to determine whether these are significantly higher than elsewhere in Asia. Interphil Laboratories is a major player in the local contract manufacturing sector.

#### ... improve competition/quality

The effect of the dominant market position of some companies in the pharmaceutical sector has also been highlighted in a study on the likely effect of increased competition on drug prices.

The study, by the University of the Philippines, noted that around 80% of companies distribute products through Zuellig Pharma, while Mercury Drug holds around 60% of the retail market. Parallel imports may well find it hard to penetrate these sectors and thus have their price advantages eroded, the Manila Bulletin reports the study as saying. One suggested way to control costs more tightly would be for the government to use its own network of medical facilities to carry out distribution activities.

Meanwhile, the Pharmaceutical and Healthcare Association of the Philippines (PHAP), which represents research-based multinationals, has again called for improved generic quality. Government, industry and doctors should work together to ensure high generic standards and overcome negative perceptions, while counterfeit and unregistered parallel imports should be strictly controlled, PHAP president Ed Feist suggested.

#### .. world news in brief

**z** TCMs take larger share of Chinese oral antidiabetics: The share of the Chinese oral antidiabetic market held by

The share of the Chinese oral antidiabetic market held by traditional Chinese medicines (TCMs) increased from 17% in 1995 to 26.3% in 1998, according to a survey of major cities by the South Medical Economic Research Institute. Western synthetic drugs accounted for the remainder, led by glibenclamide with a share of 24.2%, down from 54.5% in 1995. The leading TCM product in the category in 1998 was Guangzhou Traditional Medicine Factory's Xiao Ke Wan, with a 15.7% share, Pro Re Nata's PRN Profile quotes the survey as showing.

a WIPO to simplify global patent system:

The World Intellectual Property Organisation (WIPO) is working on a new patent law treaty aimed at cutting the cost and complications of patent protection and making the system more user-friendly. Member countries agreed most of the treaty's provisions last year and it is expected to be adopted during the next three weeks, the UK Financial Times newspaper reports. It will come into effect after ten WIPO members ratify it. The new treaty will allow applicants to make an initial filing without using a patent agent and to file applications in any language, even if a translation is required later. WIPO members are expected to discuss more substantive issues later this year, including reconciling the US's "first-to-invent" system of patent priority and the "first-to-file" approach used in the rest of the world.
